## Respiratory Care Bachelor's Degree Faculty

### Ijaz Ahmed, MBBS, CRT, RRT

I graduated from Allama Iqbal Medical College in Pakistan in 1993, receiving an MBBS, followed by an internship and residency at Service Hospital in Lahore, Pakistan. I am certified by the Educational Commission for Foreign Medical Graduates through the examination method. I also received a MS degree from the University of Texas Medical Branch in Galveston and received an AS from Tallahassee Community College in Florida in Respiratory Care with honors. Previously, I was employed at the Kansas University Medical Center and the University of Texas Medical Branch as a professor in their Bachelor of Science in Respiratory Care program and in Gastroenterology. I hold CRT (Certified Respirator Therapist) and RRT (Registered Respiratory Therapist) credentials issued by the National Board of Respiratory Care. Previously, I was employed at the Kansas University Medical Center and the University of Texas Medical Branch as a professor in their Bachelor of Science in Respiratory Care program and in Gastroenterology.

I have published my experimental endoscopic work in several peer-reviewed publications — including *Respiratory Care*, *Gastrointestinal Endoscopy*, *Endoscopy*, and *The Journal of Ultrasound Medicine* — and presented my research at national and international conferences. I have also contributed to the Digital Atlas of Video Education Project for the American Society for Gastrointestinal Endoscopy, a collection of gastrointestinal endoscopy teaching videos along with medical lectures and presentations that is a valuable asset to physicians. I am also an active member of the California Society of Respiratory Care and the American Association of Respiratory Care.

Under my supervision, this program continues to grow and make a difference in the Respiratory Care profession. My experience at Skyline College has allowed me to become an effective educator in a diverse setting. We serve a very diverse community from various academic, socioeconomic, and ethnic backgrounds, and I strongly believe that our students are our future.

### Kate Bencoter

Kate Bencoter is the Program Director for Napa Valley College's Respiratory Care Program. Earlier in her career, she worked at Beth Israel Hospital in Boston and Children's Hospital in Oakland. Kate loves working in education, watching her students grow into health care professionals. She is thrilled that Skyline College is offering the respiratory care baccalaureate degree and is excited to be a part of it. In her spare time, she loves to bicycle, travel, and spend time with family and friends.

### Ray Hernandez, MPH, RRT-NPS

In 1986, I started my professional career focusing energy and passion in the health care arena. As a licensed Respiratory Care Practitioner, my efforts have centered on those with issues related to lung health; specifically with populations prenatal to 18 years of age. As I mastered providing care to patients in the clinical setting, my passion expanded to providing education in the clinical arena to health care colleagues and Respiratory Care students. These wonderful experiences subsequently led me to the

academic setting. In 1997, I became a faculty member of the Respiratory Care Program and in 2011 became Dean for Science, Math, and Technology at Skyline. Over the years, I have been able to bring academic and community resources together and provide effective leadership to educate diverse student populations. I also continue to serve on the board for the California Society for Respiratory Care as chair for the Professional Advancement Committee.

## Lisa Bazile Hills, MS, RRT, RCP

Lisa Bazile Hills has twenty-eight year's experience as a Respiratory Care Professional with progressive management experience in multifaceted healthcare systems and academic settings.

A California native, she earned a B.S. degree in Human Development for the University of California, Davis. She later received an A.S. degree in Respiratory Therapy from Loma Linda University. While employed as a Respiratory Therapist, at Stanford University Hospital, she earned her M.S. degree in Health Services Administration from St. Mary's College, Moraga. In the last twelve years, she has served as the Manager of Respiratory Care Services for Kaiser Permanente Hayward, Fremont, and San Leandro. She is a member of both the American Association of Respiratory Care and the California Society of Respiratory Care.

Lisa is currently consulting with the Respiratory Care department at the Contra Costa Regional Medical Center. My work experience has enabled me to develop a wide range of skills and abilities in Leadership and Management. My many achievements include successful implantation of training models for new hospital systems and processes, sustainable staff competency and educational requirements, and developed effective models for meeting organizational goals. I have developed proficiency in both financial and personnel/staff management. In a broader scope, I have experience and knowledge in the successful behaviors needed for strong dynamic leadership. I have an immense understanding of the role of the Respiratory Care Practitioner in the HealthCare industry and the skills needed to be a successful Respiratory Care Practitioner.

## Tanya Ho, MHA, RRT

I am a registered respiratory therapist with 13 years of experience working in various settings such as acute inpatient, diagnostic outpatient, management, and academic settings. I have worked with all age groups internationally in interdisciplinary team settings. I started my career working in British Columbia, Canada. I developed a taste for travel and went on to become a traveler in Arizona, Hawaii, and Washington. This experience gave me a broad perspective on the healthcare system in different countries allowing me to appreciate the pros and cons of each system. After years of working at the bedside, I went to a management position at Community Hospital of the Monterey Peninsula (CHOMP) in Monterey, California. I gained valuable experience leading teams, projects, and many other aspects of running a department. From there I went on to become an educator. I am currently the program director at Hartnell College, a public community college, in Salinas, CA. I started the program from scratch and implemented the program in Fall, 2013. My experience as an instructor at Hartnell has allowed me to become an effective educator in a very diverse setting. Our college serves a community from various academic, socioeconomic, and ethnic backgrounds. I have worked with students from all ages and walks of life. I feel these individuals enrich our program and allow us to improve the quality of care for the communities we serve.

I firmly believe in supporting professional organizations dedicated to advancing the respiratory care profession. I am involved in our region chapter of the California Society for Respiratory Care (CSRC), the greater bay area region (GBAR). My involvement with the GBAR allowed me to establish relationships with the faculty and dean from Skyline College as well as faculty from other community colleges of the greater bay area offering respiratory care programs. This led to my involvement as a team member on course development and instructor at Skyline College for the bachelor program. I'm thrilled to be on the Skyline team and hope that I can help my students not only achieve their goals, but have fun along the way!

## Brielle Plump

Brielle was born in Oakland, and has lived in California for most of her life. At the University of California, Davis she studied Communication, examining how media and technology influence behavior and perception. After interning for the National Arthritis Foundation in Washington, D.C., and researching Health Reform messaging, Brielle knew that she wanted to support behavioral health education through the lens of communication. She moved to Southern California to work in Medical Education marketing for Kaplan Test Prep while pursuing an MA in Communication at San Diego State University. The bulk of Brielle's research considered communication within health teams and integrative medicine contexts, however she is also interested organizational, intercultural and interpersonal communication topics. Since returning to the Bay Area Brielle has worked for several non-profit organizations aimed at skills based learning, including her current role with Girls Leadership. She also teaches yoga and is a wellness coach. For more information on her background or a list of publications visit [Briellejamieplump.com](http://Briellejamieplump.com).

## Kimberly Trotter, MA, RPSGT

Kimberly began her sleep career while completing her Master's Degree in Psychology with an emphasis in behavioral sleep research. She started as a clinical sleep technologist, conducting sleep disorders testing in a sleep disorders center, and has been in the field of sleep for 29 years.

Over the years, she has published and presented sleep research, created and taught insomnia classes, coordinated support groups for sleep apnea sufferers, presented educational talks on sleep and health to the public, written numerous articles on sleep: for the public and the profession, taught sleep disorders medicine to future technologists and physicians, and accredited two sleep disorders centers. She served on the AAST Board of Directors from 1996-1998, was the 1999 recipient of the Carskadon Research Award, and the 2006 recipient of the Allen DeVilbiss Literary Award.

She is currently the Administrative Director of the University of California San Francisco Adult and Pediatric Sleep Disorders Center, AAST Ethics Committee member, Founding member of the California Sleep Society, and has a very active support group for sleep apnea sufferers.

# Respiratory Care Bachelor's Degree Support Staff

## Krystal Craddock, RRT-NPS, CCM

I started my career in respiratory therapy in 2007, and had enjoyed working with adult and pediatric patients in critical care and trauma for the first five years as an RT. I became a full time COPD Case Manager in 2012 and received my Certification in Case Management (CCM) in 2014. I have had the pleasure of presenting RT Case Management at respiratory state conferences across the country, as well as the COPD Foundation's annual conference, College of CHEST Physicians, ATS conference, and AARC congresses where I achieved the Charles W. Serby COPD Research Fellowship Award in 2013. I am currently on the RT Magazine advisory board for my expertise in COPD care and continue to work full time as a COPD Case Manager at the University of California, Davis Medical Center. I am grateful and acknowledge that all my successes are due to my patients; not only am I able to provide them with education leading to their empowerment, but I am able to learn a great deal from them every day.
