# **EFFECTIVE ASSESSMENT PRACTITIONERS:**

- make outcomes visible to students**
- incorporate outcomes into faculty practice**
- assess an assignment that aligns with the SLOs**
- collaborate with colleagues to establish criteria**
- use outcomes, assessments and results for ongoing conversations about teaching effectiveness and practices**
- forge action plans, when needed**
- assess anew to determine if the changes have an impact**

# ASSESSMENT STEPS

- Articulate course outcomes.**
- Develop a meaningful and sustainable assessment plan.**
- Collect assessment results.**
- Make meaning from the assessment results.**
- Use assessment results to inform and implement action plans and/or leverage institutional resources to address gaps in learning.**
- Begin the cycle anew...**

# POTENTIAL ACTIVITIES

- **Analyze results** from prior semester(s) and shape action plans.
- **Establish the parameters for assessment** (e.g., identify common characteristics of assignments being assessed, create a common task/ activity/test question(s), determine when the assessment will take place and under which conditions-- such as sample size from all of the sections of a course...).
- **Create needed instruments** such as rubrics.
- **Host “norming” sessions** to ensure consistency in applying rubrics.
- **Analyze alignment** of course level SLOs to PSLOs.
- **Determine what will be assessed this year and whom to contact.**
