Skyline College Construction Projects

The next several years are bringing exciting changes to the Skyline College campus. A number of major capital improvements will ensure we continue to meet the ever-changing needs of our students, faculty and staff with state-of-the-art facilities. Join us for an **Informational Open Forum** on Capital Projects **Friday, May 1, 2018 from 2:00 p.m. – 4:00 p.m.** in the **Fireside Dining Room** to learn more about each of these projects.

The open forum will feature tabletop displays and detailed presentations by SMCCCD planners including Director of Capital Projects Chris Strugar-Fritsch, and Construction Campus Manager Glenn Claycomb. All students, faculty and staff are encouraged to attend.

The new facilities include a new **Environmental Science Building** designed to capitalize on Skyline College's unique location overlooking the Pacific Ocean and a new **Social Science and Creative Arts Complex** that will establish an inviting gateway to an expanded central quad.

These projects will inevitably have impact in terms of parking, road closures, office relocations and construction noise. The Town Hall will cover the latest news on these impacts.

Please attend the Town Hall to learn about the next generation of educational facilities, as we work to provide the best possible education for Skyline College students.
