Online Education

Online Education is designed to make your education possible via online and hybrid learning environments. This provides you with a more flexible way to schedule your classes and manage your workload, but it also requires additional self-discipline and organization to stay on top of your work.

Online courses are offered through **Canvas** and are recommended for students who can work well independently and have solid study skills and self-discipline. Please remember that online courses require as much time and effort as on-campus classes but provide you with additional flexibility to merge education with your everyday life.

Types of Online Courses Offered

Skyline College offers two types of online courses: online and hybrid. Knowing the difference between these two options will help students choose the best option for their learning.
