**Subject:** RE: Accreditation Standard IIIC

Hi Joe & Ricardo,

I heard back from Yoseph and went ahead and made changes directly to the attached document. I am attaching the latest version and pulling Avi & Yoseph into the email thread in case they have any feedback.

The changes:
- We no longer using Sophos PureMessage - With Office 365, we now have a built-in multiple spam filters through Exchange Online Protection (EOP) service, so our email is protected from the moment we receive first incoming message.
- We no longer use Snort to detect and control unauthorized network intrusion because our new firewall handles this now
- We no longer use OpenDNS to prevent faculty, staff, and students who use the District's network from being redirected to known malicious websites because our new firewall handles this now
- Our number of instructional servers has expanded so for now I just removed the number "7" and said that ITS maintains instructional servers.
- As of August 2018, Skyline was upgraded from a 1GB network connection to 10GB

Here's some more info from Yoseph regarding CENIC connection and network backbone:
- Skyline College's Internet connection was upgraded to 10Gig circuit in August 2018: Preceding with projects such as campus firewall, core switch and router upgrades has prepared Skyline College to upgrade all of its campus Internet circuits connections from 1Gig to Corporation for Network Initiatives in California (CENIC) 10 Gigabits backbone with redundant (10Gig) connection. The upgrade allows Skyline College to connect to CENIC's high-speed research and education network, which is 10 times faster than previous connection.

- Campus Internet Traffic Report:
  - CENIC Primary 10G Internet Circuit https://cricket.cenic.org/grapher.cgi?target=%2Futilization%2Fcommunity-colleges%2Fsky-cc-

[4%2Ftengige0_0_2_0;view=Octets](#)
- CENIC Secondary (Backup) 10G Internet Circuit
  [https://cricket.cenic.org/grapher.cgi?target=%2Futilization%2Fcommunity-colleges%2Fsky-cc-3%2Ftengige0_0_2_0;view=Octets](https://cricket.cenic.org/grapher.cgi?target=%2Futilization%2Fcommunity-colleges%2Fsky-cc-3%2Ftengige0_0_2_0;view=Octets)

Thanks,
Jaz

Thank you both for all your help. I did a little more editing to try and make the narrative flow a little better together. It dealt with moving text around. I think the only things that we need to confirm now is that the information on Pages 4 and 5 in yellow is correct. Jaz, once you here back from Yoseph, please let us know.

Thanks!

Joe

Hi Ricardo,

I am attaching an updated version of the document in which I removed the highlights on all the areas that are still accurate. I sent a list of questions directly to Yoseph on items I needed to double check on such as number of instructional servers, if we still have puremessenger and a couple network questions. For the most part everything was accurate.

Jaz

Hi Jaz,

We have a couple of question about whether or not some items are still accurate or if they have changed since the last cycle.

You'll need to enable markup to view the comments with questions.

Let me know if need me to clarify anything or if you need anything else from us.

Thank you!

Ricardo

Hi Folks,

   I know you are all actively working on your Accreditation Standard IIIC.  I believe at this point everyone received a draft from ITS and you are each working on filling in the gaps with information specific to your colleges.  I am reaching out to see if there is anything you need from us to finish your drafts.  Please provide me with any missing information or evidence and we will do our best to get it gathered for you on our side.

Thank you,
Jaz
