Skyline HSEPC November 5th 2026 Transcript

00:00:18.700 --> 00:00:27.229

Paul Cassidy: Welcome, everyone, to the November 5th Health, Safety, and Emergency Preparedness Committee meeting.

3

00:00:27.650 --> 00:00:33.240

Paul Cassidy: And we usually start off by, mentioning the…

4

00:00:33.440 --> 00:00:46.210

Paul Cassidy: gathering space norms, which we summarized by saying we can disagree, but please let's not be disagreeable. If someone… so the next item is the agenda for today.

5

00:00:46.280 --> 00:00:57.229

Paul Cassidy: And we'll hold off on approving the meeting notes for October, because I got them up very recently, and there hasn't been a reasonable chance for anybody to consider them.

6

00:00:57.440 --> 00:01:03.130

Paul Cassidy: So if we could approve today's agenda,

7

00:01:03.330 --> 00:01:07.799

Paul Cassidy: That would be great, and I would need, a motion and a second.

8

00:01:10.800 --> 00:01:11.160

Ash Asaro: emotional.

9

00:01:11.160 --> 00:01:16.019

Debra Glenn: to approve… oh, sorry, the… can I? Actually, can I vote? Most committees, I cannot.

10

00:01:16.020 --> 00:01:17.100

Paul Cassidy: You can.

11

00:01:17.170 --> 00:01:18.270

Ash Asaro: I can't.

12

00:01:18.270 --> 00:01:19.700

Paul Cassidy: I'm voting, but you can.

13

00:01:19.700 --> 00:01:21.499

Debra Glenn: Oh, okay. Motion.

14

00:01:21.650 --> 00:01:22.250

Debra Glenn: Yes.

15

00:01:23.300 --> 00:01:23.730

Paul Cassidy: session.

16

00:01:23.730 --> 00:01:24.910

John Chew: I second that motion.

17

00:01:25.320 --> 00:01:26.910

Paul Cassidy: Okay, perfect.

18

00:01:27.220 --> 00:01:36.180

Paul Cassidy: All in favor of approving today's agenda, please, indicate so by putting up your hand now.

19

00:01:39.710 --> 00:01:41.040

Paul Cassidy: Thank you, everybody.

20

00:01:43.150 --> 00:01:45.119

Paul Cassidy: Thank you, you can put your hands down now.

21

00:01:46.950 --> 00:01:54.699

Paul Cassidy: All right, and then, does anyone… Not approve of today's agenda.

22

00:01:59.000 --> 00:02:00.779

Paul Cassidy: I don't see anything.

23

00:02:01.090 --> 00:02:03.610

Paul Cassidy: Emily, we can only vote once.

24

00:02:05.870 --> 00:02:06.810

Emily Risk: Oh, man.

25

00:02:08.550 --> 00:02:13.849

Paul Cassidy: And, just like in a regular election.

26

00:02:14.160 --> 00:02:19.250

Paul Cassidy: Does anyone abstain, from today… from this vote?

27

00:02:23.110 --> 00:02:34.190

Paul Cassidy: Okay, so it passes, and today's agenda is approved. And Emily, if you're ready, you're next on the committee updates.

28

00:02:34.370 --> 00:02:48.959

Emily Risk: Okay, great. So, we had our health fair, and it was awesome. We had 31 vendors in attendance when we were able to give 54 flu shots to the community members that wanted them that day, and the nursing students gave them, which was also awesome for them to get the practice.

29

00:02:49.030 --> 00:02:54.800

Emily Risk: We also, during the health fair, made a connection with San Mateo Health to bring their…

30

00:02:54.940 --> 00:03:06.499

Emily Risk: STI testing van to our next health fair. We're gonna try to make that happen, so during the health fair, people who want and qualify for free testing will be able to get it during the event's time.

31

00:03:06.690 --> 00:03:14.729

Emily Risk: So, that is exciting for us. And we're finalizing the details on… regarding the installation of the Narcan…

32

00:03:15.040 --> 00:03:21.420

Emily Risk: Vending machine that'll be located in Building 6 right next to Public Safety, so we're still…

33

00:03:21.540 --> 00:03:34.339

Emily Risk: we had a meeting with a member of the county that'll be handling the transfer with Max on making sure that everything is set. So it's looking good, it's looking like it's gonna happen soon. We're also going to get a Narcan

34

00:03:34.410 --> 00:03:53.629

Emily Risk: newspaper stand, they're called, and that is going to be located in the front by the bus circle. We learned from Bonsara what the front of our building is called now. Thanks, Benzara. And that's where we're going to put the vending machine for Narcan. That'll be outside, so that people can access it when the building is locked.

35

00:03:54.290 --> 00:04:11.939

Emily Risk: All in hopes. And the upcoming events we have, next Wednesday from 9 to 1.30 in Building 6 upstairs is going to be our blood drive. So there'll be flyers everywhere, and on our website, you can also access a QR code where you can make an appointment. We still have slots available.

36

00:04:11.940 --> 00:04:18.209

Emily Risk: 19 out of the 36 available appointments have been filled, so we still need to do some work in getting people to sign up.

37

00:04:18.910 --> 00:04:25.609

Emily Risk: And then Personal Counseling has Stress Less Week scheduled for November 16th through the 19th. Coming up.

38

00:04:26.540 --> 00:04:27.889

Emily Risk: That is it for me.

39

00:04:28.810 --> 00:04:31.800

Paul Cassidy: Awesome. Thank you, Emily. I really appreciate that update.

40

00:04:31.800 --> 00:04:32.260

Emily Risk: No problem.

41

00:04:32.260 --> 00:04:41.769

Paul Cassidy: And then, Michele Rudovsky is here, in, to help us with the facilities update.

42

00:04:42.160 --> 00:04:44.359

Paul Cassidy: It says max, but yeah, go ahead.

43

00:04:44.810 --> 00:04:53.030

Michele Rudovsky: Thanks, thanks, everyone. Max is out this week, and so I'm… I'm sitting in for him. I'll just share with everyone that,

44

00:04:53.040 --> 00:05:07.100

Michele Rudovsky: Safety-wise, the distributed antenna system, that is to boost cell service, that project is, moving along nicely. We are in the process of.

45

00:05:07.100 --> 00:05:14.059

Michele Rudovsky: Working with 3, different, carriers, T-Mobile, Verizon, and AT&T.

46

00:05:14.070 --> 00:05:20.600

Michele Rudovsky: And I know this has been a long time coming since, the,

47

00:05:20.880 --> 00:05:33.039

Michele Rudovsky: since cell service is such a challenge on the Skyline College, so, we expect, at the end of November, early December, so December timeframe for T-Mobile.

48

00:05:33.050 --> 00:05:50.009

Michele Rudovsky: to be, activated, and Verizon ended December, and then, we're hoping for February or so for AT&T. So, it has been a long time coming, but, we are getting really close to getting this

49

00:05:50.120 --> 00:06:06.779

Michele Rudovsky: fired up for all of you. Some of you may have experienced, if you have T-Mobile, T-Mobile's already on site and has installed their equipment. You may have experienced that you sometimes have signal and sometimes don't. It's not 100% live yet.

50

00:06:06.780 --> 00:06:11.399

Michele Rudovsky: Okay? But, they're… they're working out the… working out the bugs on that.

51

00:06:11.850 --> 00:06:26.489

Michele Rudovsky: Then also, just a… a quick, update on student housing. I know this is the Safety Committee meeting, but I just like to remind everyone that this is district-wide student housing, so your students from all three campuses

52

00:06:26.490 --> 00:06:32.329

Michele Rudovsky: will be, able to utilize student housing. It's in construction now, and,

53

00:06:32.410 --> 00:06:35.910

Michele Rudovsky: It is scheduled to be open in, 2028.

54

00:06:36.610 --> 00:06:41.019

Michele Rudovsky: Okay, and that's really all I have, unless any of you have any questions for me.

55

00:06:44.290 --> 00:06:45.450

Michele Rudovsky: Okay, thank you.

56

00:06:51.070 --> 00:06:53.990

Michele Rudovsky: And, Paul, you're… you're muted.

57

00:06:54.320 --> 00:06:59.700

Paul Cassidy: Sorry, there seems to be a question in the chat about the blood drive. It's usually on the quad.

58

00:07:00.390 --> 00:07:01.330

Paul Cassidy: Right.

59

00:07:02.360 --> 00:07:04.010

Paul Cassidy: 4 and B6.

60

00:07:04.010 --> 00:07:06.679

Emily Risk: No, it's in Building 6 upstairs.

61

00:07:06.680 --> 00:07:07.020

Paul Cassidy: Upstairs.

62

00:07:07.020 --> 00:07:12.039

Emily Risk: We either have it there, upstairs, or we've had it in Building 12.

63

00:07:12.530 --> 00:07:15.470

Paul Cassidy: B12, and it's in the middle of the day. Which day was it?

64

00:07:15.470 --> 00:07:23.349

Emily Risk: It's from… it's from 9 until 1.30 in Building 6 upstairs. That's where we are this year.

65

00:07:24.870 --> 00:07:25.739

Paul Cassidy: Thank you. Thank you, man.

66

00:07:25.740 --> 00:07:26.290

Emily Risk: Yep.

67

00:07:27.940 --> 00:07:29.280

John Chew: day, really quick.

68

00:07:29.910 --> 00:07:30.670

Paul Cassidy: Oh, the day.

69

00:07:31.400 --> 00:07:32.270

Emily Risk: Wednesday.

70

00:07:32.610 --> 00:07:33.560

John Chew: Thank you.

71

00:07:33.750 --> 00:07:35.920

Emily Risk: Yeah, this… this coming Wednesday.

72

00:07:39.030 --> 00:07:40.339

Paul Cassidy: Tommy.

73

00:07:40.920 --> 00:07:41.910

Paul Cassidy: Are you…

74

00:07:42.310 --> 00:07:49.859

Thommy Reyes: Not much really from public safety, we just dealt with the, two students that ultimately got suspended for…

75

00:07:50.300 --> 00:08:01.410

Thommy Reyes: significant amount of time till next year. We're still dealing with one of them in regards to retrieving his property, and that's pretty much all we have.

76

00:08:02.010 --> 00:08:04.410

Thommy Reyes: Unless anyone has a question regarding that.

77

00:08:07.120 --> 00:08:09.400

Paul Cassidy: See any questions?

78

00:08:11.050 --> 00:08:13.229

Paul Cassidy: There's Nadia. Nadia, you have a question.

79

00:08:13.790 --> 00:08:14.840

Nadia Tariq (she/her/hers): Thank you.

80

00:08:14.860 --> 00:08:33.249

Nadia Tariq (she/her/hers): Tommy, is it feasible to, like, send out some sort of communication about what needs to happen, or what procedure we need to follow once we come across any emergency or needing public safety support? Because I know over the years, a lot of our colleagues, faculty, and classified professionals

81

00:08:33.250 --> 00:08:41.100

Nadia Tariq (she/her/hers): have come on board, and they may not necessarily know the procedure. So it would be good to have a reminder communication sent out, or some.

82

00:08:41.100 --> 00:08:44.439

Thommy Reyes: Are you talking… are you talking in regards to the two students?

83

00:08:44.440 --> 00:09:01.020

Nadia Tariq (she/her/hers): No, no, no, pertaining to overall, like, you know, like, during the last month's meeting, we mentioned how if there's emergency and we dial out from our cell phone, the protocol is to inform public safety after things die down a little bit, right?

84

00:09:01.020 --> 00:09:01.730

Thommy Reyes: Yeah.

85

00:09:01.730 --> 00:09:06.369

Nadia Tariq (she/her/hers): If, like, if we can have some sort of communication or reminder.

86

00:09:07.360 --> 00:09:17.649

Thommy Reyes: Yeah, I mean, it still stands the same. I mean, essentially, you know, you dialed 7,000 for a dispatch, but if it's something that would require in 911, then go ahead and

87

00:09:18.320 --> 00:09:23.019

Thommy Reyes: 91 directly first, and then we will then be alerted via our dispatcher.

88

00:09:23.020 --> 00:09:34.430

Nadia Tariq (she/her/hers): Got it, but what I'm saying is, like, we know, right, because we've been here for a minute, I'm saying, like, for new employees who come on board, they may not necessarily know they need to dial out 7,000.

89

00:09:35.330 --> 00:09:52.329

Thommy Reyes: Yeah, you know, then we just have to figure out who they are, any new incoming staff, that we, you know, we can personally go and go with them. I just don't know, I just don't have a list for those individuals, and I don't know how I would get them. Do I get them from the deans?

90

00:09:52.900 --> 00:09:54.179

Thommy Reyes: That's a question.

91

00:09:54.630 --> 00:09:55.090

Paul Cassidy: Michele?

92

00:09:55.410 --> 00:10:16.869

Michele Rudovsky: Yeah, I can take, some of that. Thanks, Tommy, and thanks, Nadia. That's terrific. I will share that any new hires, as part of the new hire orientation that they go through with Human Resources, I get 15 minutes, of their time, and I do report out the two things that are super important to me to report out to,

93

00:10:16.870 --> 00:10:36.520

Michele Rudovsky: to our new hires are the 7,000 number, and I actually asked them to… I said, okay, we're going to take our time now, and you're going to put it in your cell phone right now. We take that time. And then also, I always ensure that they sign up for, our RAVE notifications. And so, that's part of our onboarding.

94

00:10:36.520 --> 00:10:40.060

Michele Rudovsky: For new hire orientation for all new employees.

95

00:10:40.060 --> 00:10:53.929

Michele Rudovsky: But I also do hear you about, you know, public safety, perhaps working with, Cherie Colleen and putting out a, you know, a reminder to, to our entire college.

96

00:10:53.930 --> 00:11:02.779

Michele Rudovsky: constituency about how you get in touch with public safety. And… and yes, that you can dial from any phone,

97

00:11:02.780 --> 00:11:17.239

Michele Rudovsky: in, any campus phone, the 7000 number, and that'll go right to the dispatch and to public safety. And you also, with our phones, you can, dial 911, to, to call out.

98

00:11:17.280 --> 00:11:18.210

Michele Rudovsky: Okay.

99

00:11:18.210 --> 00:11:28.919

Paul Cassidy: Michele, I'll work with Cherie to add some… we have, like, weekly updates, we can put something in there, and then maybe another item, like, once a term that just…

100

00:11:29.260 --> 00:11:34.879

Paul Cassidy: Because your cell phone, like, 7,000 is not going to work, right? You need to know the full… you need to know the full number.

101

00:11:34.880 --> 00:11:35.510

Michele Rudovsky: I remember.

102

00:11:35.510 --> 00:11:37.159

Paul Cassidy: Yeah, so…

103

00:11:37.160 --> 00:11:37.820

Michele Rudovsky: Correct.

104

00:11:37.820 --> 00:11:43.289

Paul Cassidy: Yeah, so this is a great point to raise, Nadia and Tommy, thank you.

105

00:11:44.760 --> 00:11:45.580

Michele Rudovsky: Yep.

106

00:11:48.220 --> 00:11:50.490

Paul Cassidy: Benzara.

107

00:11:52.960 --> 00:11:53.869

Paul Cassidy: How are you today?

108

00:11:54.270 --> 00:11:56.969

Ben Zara Minkin: Great, I didn't know if I was still muted.

109

00:11:59.070 --> 00:12:08.499

Ben Zara Minkin: Good to see everyone. I wanted to briefly just go over some of the recent things since our last meeting, specifically going over the after-action for the Great Shakeout.

110

00:12:08.850 --> 00:12:11.610

Ben Zara Minkin: The drill went really well.

111

00:12:11.990 --> 00:12:22.529

Ben Zara Minkin: I know, Skyline was amazing, Vince and Tommy ran the drill really well up there. I have all of your evacuation times I heard through…

112

00:12:22.950 --> 00:12:26.679

Ben Zara Minkin: The debrief, and speaking with a lot of you in the debrief, and then speaking with…

113

00:12:26.790 --> 00:12:39.669

Ben Zara Minkin: Tommy afterwards that, the radio communication was great. It really… our new radio, protocol and allotment is, improving our communications district-wide.

114

00:12:39.670 --> 00:12:48.630

Ben Zara Minkin: For those of you that, were here in antiquity, we were always on the same radio channel, and it was really cumbersome for us all to be talking

115

00:12:48.730 --> 00:12:52.209

Ben Zara Minkin: At the same time, district-wide, when we would evacuate.

116

00:12:52.710 --> 00:13:05.539

Ben Zara Minkin: And that mayhem would be what it would look like in real life if we were all evacuating. Imagine the peninsula got a huge earthquake, and all three of the campuses were evacuating, and we were all on the same channel.

117

00:13:05.720 --> 00:13:15.629

Ben Zara Minkin: Our dispatcher would have no way of managing that accountability. With our captains, our captains would be overwhelmed not knowing who is telling them which building is being evacuated, so…

118

00:13:15.770 --> 00:13:17.690

Ben Zara Minkin: I want all of you to…

119

00:13:17.810 --> 00:13:29.130

Ben Zara Minkin: Lock that into your brains, for our building captains, lock that into your brains, that, if we have a district-wide event, that's when we're going to branch out our communication so we can manage our span of control.

120

00:13:29.580 --> 00:13:45.159

Ben Zara Minkin: And that's gonna be dictated by our dispatcher and by our campus captain. So Tommy would get on the horn and tell all you guys, hey, we're gonna be all getting on the local channel, everybody switches from channel 1 to channel 2, and then we're great to go. But when your radio is sitting.

121

00:13:45.160 --> 00:13:58.079

Ben Zara Minkin: By your desk like this. Make sure that you're keeping it on the district repeated safety channel. I had building captains that specifically asked me about this, and we had it posed in building… the Building 2 training that we just had about a week ago.

122

00:13:58.560 --> 00:14:12.159

Ben Zara Minkin: was, why aren't we on the local channel, for this, and why are we on the repeated safety channel? And that's because there might be a time where your officers or your captain on your campus is at CSM, for example, or at Kenyatta.

123

00:14:12.160 --> 00:14:20.520

Ben Zara Minkin: And you… let's say you have a violent intruder in your building, or there's flooding in your building, or something where you need to reach public safety, and you need,

124

00:14:20.860 --> 00:14:31.880

Ben Zara Minkin: to call for resources, which is what that radio is for. We want… when you push that to talk button, that it's heard between… in our public safety department district-wide, because our dispatcher is always mana…

125

00:14:32.040 --> 00:14:34.700

Ben Zara Minkin: Monitoring the district repeated channel.

126

00:14:35.060 --> 00:14:52.660

Ben Zara Minkin: And that way you can get, the resources coming to your aid as needed. So we evacuated the entire district in 10 minutes. Your campus was done in that amount of time. Earlier in the day, there was a fire alarm that went off in Building 2.

127

00:14:52.750 --> 00:15:02.720

Ben Zara Minkin: And it was due to popcorn and a microwave there at Skyline, and so Building 2 had a practice evacuation prior to the evacuation.

128

00:15:02.900 --> 00:15:06.390

Ben Zara Minkin: Which is always a fun time. Emily, I know that you were there.

129

00:15:06.500 --> 00:15:15.530

Ben Zara Minkin: We discovered gaps in that process. I'd love to tell you about that right now, briefly. So our… the way Building 2 works.

130

00:15:16.080 --> 00:15:22.950

Ben Zara Minkin: Is that not everybody has access to everybody's spaces, so in a true evacuation, when our building captains are gonna suit up, and then…

131

00:15:23.040 --> 00:15:25.879

Ben Zara Minkin: Start evacuating the building.

132

00:15:25.890 --> 00:15:42.669

Ben Zara Minkin: It might be challenging after the fire alarm has been triggered for them to get into the other spaces, so we're troubleshooting that process now with John Docter, and Max Warren is, aware of that problem. We want our building captains to have

133

00:15:42.670 --> 00:15:47.440

Ben Zara Minkin: The capacity to, do a zoned evacuation within our buildings.

134

00:15:47.870 --> 00:15:55.590

Ben Zara Minkin: That's organized, and so they're just not evacuating their own spaces in the bathrooms, which is all that Emily had access to that day.

135

00:15:57.340 --> 00:16:08.479

Ben Zara Minkin: Moving on from the Great Shakeout to our further training on… at Skyline Campus, we had, Building 2 training that lasted almost 4 hours last week.

136

00:16:08.650 --> 00:16:14.260

Ben Zara Minkin: It was really good training, from the feedback that we've received. I'm just not tooting my own horn.

137

00:16:14.570 --> 00:16:28.610

Ben Zara Minkin: It was great training because, more for the roundtables and for the ability for the occupants of the building to, talk about the challenges that they face, within the building, but then also for them to understand

138

00:16:28.610 --> 00:16:36.099

Ben Zara Minkin: The new safety hardware that we're going to be putting into our buildings. Specifically, I'm talking about our advanced bleeding control kits.

139

00:16:36.100 --> 00:16:55.830

Ben Zara Minkin: this, which is downstairs in your building right here. Inside, there's 6 kits. We went over that, and then there's also the first A box, the orange box that's in there that has advanced bleeding control kits as well. Those are on the first floor of Building 2, and they're going to be put in… on the first floor of every building district-wide, every facility district-wide.

140

00:16:55.830 --> 00:16:59.269

Ben Zara Minkin: We have a project manager that I'm working with now for that implementation.

141

00:16:59.530 --> 00:17:11.920

Ben Zara Minkin: So we're going to be rolling those out. All of those kits are going to be hooked to our AMAG system, so when we open the door to those kits in our buildings, it'll set off an alarm, so our dispatcher will know when we have those emergencies.

142

00:17:12.240 --> 00:17:23.260

Ben Zara Minkin: Everybody here in the Skyline Safety Committee should know that we have 3 generations of lockdown buttons in the district. We reviewed this in the training.

143

00:17:23.770 --> 00:17:43.719

Ben Zara Minkin: Specifically, our first, generation of lockdown button, you open the little case, and it's that little yellow case, and then you push the button, but it only severs the connection between that lockdown button and the ACAM that controls that door. And that's it, right? Nothing more can be done, it's really a localized tool.

144

00:17:43.720 --> 00:17:56.780

Ben Zara Minkin: But now, in the third generation lockdown button, the ones that have been put into Building 2, you open that case, and when you push that button, it locks down the entire building. So, all doors that have ACAMs in that building

145

00:17:56.780 --> 00:17:58.450

Ben Zara Minkin: Go into lockdown mode.

146

00:17:58.990 --> 00:18:11.979

Ben Zara Minkin: And then an alert is sent to our public safety team, it comes out over their radios, and they'll, when they read it, it'll say LDB, like lockdown button, and so they respond out much like they would for,

147

00:18:12.000 --> 00:18:31.460

Ben Zara Minkin: a duress button, comes out over their radios. And so, we need to make sure that, as a campus at Skyline, that you're aware of the capabilities of your facility, and when you migrate facilities, the change in that capacity, because that will change the way you pre-plan and strategize

148

00:18:31.460 --> 00:18:35.110

Ben Zara Minkin: Your emergency procedures or your emergency response within that locality.

149

00:18:36.870 --> 00:18:56.219

Ben Zara Minkin: there are, a couple hurdles and things that we had to discuss about, you know, future planning for the district, specifically about how we're going to standardize those lockdown buttons and how we respond to duress calls. And so, I thought it was a great training because it provides, everyone

150

00:18:56.220 --> 00:19:04.389

Ben Zara Minkin: That understanding of what public safety is going to do, and when they're supposed to, jump into action, and what the specific tools in our buildings can provide.

151

00:19:04.690 --> 00:19:28.390

Ben Zara Minkin: We have a fire drill that's coming up for our Child Development Center here at CSM. Not… we don't have one yet at Skyline, but we are getting these put into all of our buildings, for our child development centers. These will be going into the Child Development Center at Skyline in the proximal AED cabinet, in the close AED cabinet, and this will also be going into the cafeterias district-wide.

152

00:19:28.520 --> 00:19:39.210

Ben Zara Minkin: This is something called a life fact. There's a PD attachment, a pediatric attachment to it, and also an adult mask attachment, and it's really just a plunger. This is for,

153

00:19:39.640 --> 00:19:45.890

Ben Zara Minkin: chokings, so if you… I don't want to open it, this case. Well, I'll just open it. You guys can see.

154

00:19:49.210 --> 00:19:50.510

Ben Zara Minkin: Yay, Zoom!

155

00:19:50.780 --> 00:19:53.330

Ben Zara Minkin: So, can everybody see how it looks like a plunger?

156

00:19:53.390 --> 00:20:11.290

Ben Zara Minkin: This goes right over on people's faces, so when people start choking, we can use this tool to hook to the masks here, to pull out a foreign body obstruction from an airway. They have been found to be extremely effective, especially in choking infants.

157

00:20:11.830 --> 00:20:16.469

Ben Zara Minkin: And so, this is, an additional risk reduction

158

00:20:16.530 --> 00:20:35.360

Ben Zara Minkin: for the choking protocol within CPR, it's the last resort within that protocol. We're putting together the training that's going to be going on to our websites, and then it's also going to be an additional training in the building captain curriculum, so for all of you that want to be building captains, you guys will all get trained on how to use these.

159

00:20:35.360 --> 00:20:38.550

Ben Zara Minkin: And then we're also going to,

160

00:20:39.170 --> 00:20:50.670

Ben Zara Minkin: train our Child Development Center folks, and then our cafeteria folks on how they work as well, because those are the only places that they're going to be stationed district-wide.

161

00:20:51.020 --> 00:21:02.450

Ben Zara Minkin: I think that's about it. In our next district meeting, we are going to be trying to assemble, a multi-year training and exercise plan, the MTAP.

162

00:21:02.850 --> 00:21:21.110

Ben Zara Minkin: So our folks at our individual colleges will have a 3-5 year, site view of all of our drills that will be occurring district-wide, so we can help prepare on the instructional side or, on our own planning, to make sure that we're not broadsided by any of these emergency drills district-wide.

163

00:21:21.710 --> 00:21:24.019

Ben Zara Minkin: I think that's all I have.

164

00:21:24.560 --> 00:21:29.200

Ben Zara Minkin: Paul, unless anybody can think of anything else that we need to address?

165

00:21:29.520 --> 00:21:33.330

Ben Zara Minkin: Oh, I have something really cool to talk about.

166

00:21:33.330 --> 00:21:53.219

Ben Zara Minkin: Rave right now is discontinuing their old desktop notifier, and I know everyone's thinking, what is Desktop Notifier? We don't have Desktop Notifier, and it's true. We do not have Desktop Notifier. Desktop Notifier is, a program within our emergency notification platform that, let's say you're sitting at your desk, and you're doing this meeting right now, and you're listening to me.

167

00:21:53.230 --> 00:22:05.609

Ben Zara Minkin: wax poetic, but your iPhone is on silent, and… or you're away from, you know, your desk, and you're out there, and you're working on your computers, because it's not a foggy day at Skyline.

168

00:22:05.610 --> 00:22:19.059

Ben Zara Minkin: And then something's happening on your campus, and you can't hear anything because of wherever your reception is, Desktop Notifier would take over your computer and then send a message. The rave alert would come across your computer screen and take over your computer screen.

169

00:22:20.260 --> 00:22:31.399

Ben Zara Minkin: they're discontinuing that element in Raven, where they're moving to a new platform, and we will be implementing the new system district-wide. We have preliminary meetings with ITS next week.

170

00:22:31.530 --> 00:22:47.569

Ben Zara Minkin: To launch this program, we're gonna be piloting on a few laptops to make sure we work out the kinks, and then we're gonna roll it out, district-wide. This is a huge, resource for our folks that may miss our emergency notifications. It'll also take over all district signage, so…

171

00:22:47.800 --> 00:22:54.930

Ben Zara Minkin: Anything that's connected to our service, so, like, the big signs that are out in front of Skyline when you drive onto the campus, we'll be able to grab those.

172

00:22:55.100 --> 00:22:58.339

Ben Zara Minkin: So there will be more information on that as we roll it out.

173

00:22:59.050 --> 00:22:59.999

Ben Zara Minkin: That's all I got.

174

00:23:02.150 --> 00:23:03.750

Paul Cassidy: Thank you, Binzar. That was perfect.

175

00:23:03.750 --> 00:23:05.090

Qimmah Tamu: Never question.

176

00:23:05.250 --> 00:23:06.370

Paul Cassidy: Or… Yeah.

177

00:23:06.370 --> 00:23:07.940

Qimmah Tamu: Okay.

178

00:23:08.280 --> 00:23:26.269

Qimmah Tamu: So I'm a lab coordinator, and I was wondering, in terms of, like, first aid kits, is that something that we just purchased, like, on our own, like, for the individual labs, or is there, like, a district thing we have to go through for just, like, a first aid kit for the lab?

179

00:23:26.420 --> 00:23:30.730

Ben Zara Minkin: No, I love that. That's a great question. So, all… we're gonna be putting first aid kits

180

00:23:31.040 --> 00:23:42.189

Ben Zara Minkin: into every facility, so every facility will have a recessed cabinet that will say first aid and Narcan, and it'll have the orange box, and it's gonna be a mobile kit that can be taken anywhere throughout the building.

181

00:23:42.200 --> 00:23:54.079

Ben Zara Minkin: I think you've seen, the kits, we train on them in the building captain program, but if additional departments need additional kits because of the utility or, operation within that, locale.

182

00:23:54.080 --> 00:24:07.429

Ben Zara Minkin: Just, shoot me an email. We've done it for automotive, for example, just because of the higher risk there. They wanted one proximal to them, and so we can get additional for you within those areas.

183

00:24:07.670 --> 00:24:08.990

Qimmah Tamu: Awesome, thank you.

184

00:24:08.990 --> 00:24:09.580

Ben Zara Minkin: Yeah.

185

00:24:11.360 --> 00:24:16.150

Ash Asaro: Is that new? Because I have specialized ones for each of the art studios.

186

00:24:16.410 --> 00:24:33.649

Ben Zara Minkin: Yes, it's new. It's new. We're working on the project management teams and rolling them out. I've only given them out to, our child development centers, our automotive, public safety has them just for… because they're… they leverage first aid all the time. But if you… if anybody needs them,

187

00:24:33.790 --> 00:24:51.409

Ben Zara Minkin: Ash, just reach out, and I can make sure to get… I get approvals through Michele, so we can track them. We're also going through, onboarding and inventory management systems, so we don't lose all of this stuff, because I don't want to lose them. These kits are really expensive, they're top, top of line. Each first aid kit is about 500 bucks.

188

00:24:51.520 --> 00:25:03.550

Ben Zara Minkin: And we already have resupply already on all 3 of our campuses. Our resupply is housed in public safety offices, and we have 5 additional supplies on each campus, so…

189

00:25:03.550 --> 00:25:12.219

Ben Zara Minkin: Band-Aids or whatever is used from the kits, we can restock them now. So, for those of you that already do have the kits, if you need restock, just reach out to DPS.

190

00:25:12.690 --> 00:25:14.000

Ash Asaro: Fantastic, thank you.

191

00:25:14.410 --> 00:25:16.169

Paul Cassidy: Nadia, I see your hand is up.

192

00:25:16.170 --> 00:25:26.150

Nadia Tariq (she/her/hers): Thank you, Paul. Thank you, Ben, for sharing the information. I was just gonna basically suggest, if it's feasible to have at least one… one of these kids at each division office?

193

00:25:28.060 --> 00:25:41.880

Ben Zara Minkin: Our old injury and illness plan, which we're working on revising now, said that we would have them there, but there was too much cost and too many of those kits that would be out in a situation, and we… and when we reviewed…

194

00:25:41.880 --> 00:25:54.959

Ben Zara Minkin: Our old plan, most of those goods were expiring and hard to account for. I would be open if there's a need when we can do a risk assessment for that area for installing additional, but right now.

195

00:25:54.970 --> 00:25:58.159

Ben Zara Minkin: The model is going to be one for every facility.

196

00:26:01.160 --> 00:26:02.100

Nadia Tariq (she/her/hers): Thank you.

197

00:26:03.320 --> 00:26:04.300

Paul Cassidy: Thanks, Nadia.

198

00:26:04.720 --> 00:26:10.110

Paul Cassidy: Thank you, Ben Zahra, for that excellent update.

199

00:26:10.330 --> 00:26:22.060

Paul Cassidy: there's no action items for today, and in our committee updates, I believe we touched on all the topics there. There's a link in the agenda for the training resources.

200

00:26:22.430 --> 00:26:32.060

Paul Cassidy: And then for… we have 3 items for future, meetings that we can look forward to. So, one is a discussion about the Zoom phones.

201

00:26:32.200 --> 00:26:34.340

Paul Cassidy: And,

202

00:26:34.690 --> 00:26:44.719

Paul Cassidy: every year, we also have Perry Chen come and talk, so I'm trying to get him to come to this committee again and just, give us an update about,

203

00:26:45.370 --> 00:26:57.120

Paul Cassidy: The student, you know, how to… Navigate student issues. And then also,

204

00:26:57.330 --> 00:27:16.459

Paul Cassidy: Carl asked that, if the Workplace Violence Prevention Survey is something that we could talk a little bit about, so I'm going to reach out to HR at the district office and see if they're able to, give us some background or some more detailed information about those three items.

205

00:27:16.750 --> 00:27:20.880

Paul Cassidy: Is there any other items, that…

206

00:27:21.050 --> 00:27:30.789

Paul Cassidy: the committee would like added to the future agenda items, and I can do my best to see what resources we can bring to bear on the topic.

207

00:27:32.810 --> 00:27:34.430

Paul Cassidy: All right, well, if you think of it…

208

00:27:34.740 --> 00:27:38.440

Paul Cassidy: Later, you can always email me or,

209

00:27:38.580 --> 00:27:43.180

Paul Cassidy: or any other form of communication, and I can add it.

210

00:27:43.440 --> 00:27:47.990

Paul Cassidy: I want to say thank you to everyone, and

211

00:27:48.720 --> 00:27:58.590

Paul Cassidy: I appreciate your time to this valuable committee, and that does bring us to the end of today's agenda, so with that, we will adjourn, but

212

00:27:58.590 --> 00:28:16.349

Paul Cassidy: As always, again, email me, call me, whatever form of communication works, and I'll be happy to explore any issues that you want to revisit, either outside this committee or bring it to the committee, okay? Thanks again, everybody, see you on campus, and have a great…

213

00:28:17.150 --> 00:28:26.270

Paul Cassidy: beginning to the holiday season, so we'll see everybody in December. December 3rd is the next meeting, so until then, everyone, bye-bye.

214

00:28:26.570 --> 00:28:27.020

Ben Zara Minkin: Bye, everyone.

215

00:28:27.020 --> 00:28:28.700

Debra Glenn: Bye all, thank you.
