HSEPC Meeting Transcript October 1, 2026

1
00:03:34.100 --> 00:03:34.810
Thommy Reyes: you.

2
00:04:37.180 --> 00:04:38.120
Christine Herndon: Hey, Paul.

3
00:04:38.120 --> 00:04:40.360
Paul Cassidy: Christine, how are you? Good afternoon.

4
00:04:40.610 --> 00:04:41.260
Christine Herndon: Oh.

5
00:04:42.870 --> 00:04:44.330
Paul Cassidy: Tommy, good afternoon.

6
00:04:44.630 --> 00:04:47.410
Thommy Reyes: Hello Paul. Hello Christine. I'm Tommy.

7
00:04:47.420 --> 00:04:48.120
Christine Herndon: Hello.

8
00:04:52.270 --> 00:04:53.510
Christine Herndon: Hey, Brandon!

9
00:04:54.380 --> 00:04:55.449
Brandon Becerra: Hi, Christine.

10
00:04:55.450 --> 00:04:55.980
Christine Herndon: How are you?

11
00:04:55.980 --> 00:04:56.670
Thommy Reyes: Yeah.

12
00:04:57.070 --> 00:04:57.510
Brandon Becerra: Hi, Tommy.

13
00:04:57.510 --> 00:04:58.210
Thommy Reyes: Brandon.

14
00:04:58.210 --> 00:04:58.890
Brandon Becerra: Good.

15
00:04:58.990 --> 00:04:59.799
Brandon Becerra: Holding the port.

16
00:04:59.800 --> 00:05:00.210
Thommy Reyes: No.

17
00:05:30.730 --> 00:05:33.039
Thommy Reyes: Hey, Paul, where's your office at, Paul?

18
00:05:33.690 --> 00:05:38.019
Paul Cassidy: This office is in B4.

19
00:05:38.220 --> 00:05:43.410
Paul Cassidy: In the, southeast corner.

20
00:05:43.410 --> 00:05:44.030
Thommy Reyes: Okay.

21
00:05:44.240 --> 00:05:44.880
Paul Cassidy: Yeah.

22
00:05:45.120 --> 00:05:49.249
Paul Cassidy: So have you… Sort of walk in the main doors, and then…

23
00:05:49.450 --> 00:05:50.400
Thommy Reyes: Make a left.

24
00:05:50.650 --> 00:06:00.119
Paul Cassidy: Yeah, but if you go all the way to the wall and then make the left, and then I'm down in the corner. If you make the left as soon as you walk through the door, then you have to make a right.

25
00:06:00.370 --> 00:06:01.409
Paul Cassidy: further down.

26
00:06:02.080 --> 00:06:07.350
Thommy Reyes: Okay, I just… I haven't been able to come by and say hello, but I've done some runs, so…

27
00:06:07.510 --> 00:06:09.249
Paul Cassidy: I can come to you, I need the exercise.

28
00:06:09.250 --> 00:06:09.980
Thommy Reyes: Yeah.

29
00:06:12.550 --> 00:06:16.409
Thommy Reyes: Now, Christine, what department are you with? Because I'm the new guy here.

30
00:06:17.550 --> 00:06:22.599
Christine Herndon: I am the Child Care Services Coordinator for the Child Development Lab Center in Building.

31

00:06:22.600 --> 00:06:23.410
Thommy Reyes: Oh!

32
00:06:24.900 --> 00:06:29.669
Thommy Reyes: Yeah, you know, the last time I was there, Tina was still there, so she must have left, right?

33
00:06:29.670 --> 00:06:35.439
Christine Herndon: She didn't leave, she's the department chair now for child development. She's still here.

34
00:06:36.490 --> 00:06:37.370
Thommy Reyes: Hey, Max.

35
00:06:37.770 --> 00:06:38.560
Christine Herndon: Max.

36
00:06:40.210 --> 00:06:42.269
Max Warne: Hello! How's everybody doing?

37
00:06:42.940 --> 00:06:43.590
Thommy Reyes: Oh.

38
00:07:01.940 --> 00:07:04.369
Thommy Reyes: Brandon, the camera's working pretty good, huh?

39
00:07:06.480 --> 00:07:14.209
Brandon Becerra: Yes, sir. We actually had Wendy here today. She was, fixing everything up today, so she put the final touches in. We're back in action.

40
00:07:14.440 --> 00:07:15.650
Thommy Reyes: Nice, okay.

41
00:07:22.710 --> 00:07:29.920
Thommy Reyes: Yeah, just something about my background. I feel like I'm coming from the, From the fog… But.

42
00:07:31.360 --> 00:07:34.989
Brandon Becerra: You know you're at Skyline when you have the fog in the background.

43
00:07:34.990 --> 00:07:35.910
Thommy Reyes: Yeah.

44
00:07:38.070 --> 00:07:42.030
Max Warne: Tommy, they have all these, cool backgrounds loaded now, so…

45
00:07:42.030 --> 00:07:42.640
Thommy Reyes: Yeah.

46
00:07:42.640 --> 00:07:48.459

Max Warne: You always look through them. That always happens to me. I always get like crazy background light and it like blurs me out.

47
00:07:49.430 --> 00:07:54.300
Thommy Reyes: Yeah, I still have to learn how to put some kind of a background picture, you know?

48
00:07:56.010 --> 00:07:57.390
Thommy Reyes: Well, so, hey Vince!

49
00:07:58.920 --> 00:08:01.029
Vince Garcia: Hey, Tommy. Hello, everyone.

50
00:08:01.620 --> 00:08:02.240
Max Warne: Hey, Vince.

51
00:08:02.240 --> 00:08:02.860
Paul Cassidy: Thanks.

52
00:08:02.860 --> 00:08:05.939
Vince Garcia: How you guys doing? Brandon, Paul, how's everybody?

53
00:08:06.330 --> 00:08:08.569
Paul Cassidy: Good, thank you, Vince, for your help with the website.

54
00:08:08.840 --> 00:08:14.010
Vince Garcia: Oh yeah, absolutely. Thanks for giving me the updated information. That makes it real easy.

55
00:08:33.990 --> 00:08:34.980
Thommy Reyes: Hey, Jim.

56
00:08:36.070 --> 00:08:36.970
Paul Cassidy: James here.

57
00:08:36.970 --> 00:08:39.019
J Vangele: Good afternoon, how's it going?

58
00:08:39.200 --> 00:08:39.990
Thommy Reyes: Jimmy.

59
00:08:40.059 --> 00:08:41.350
J Vangele: Good.

60
00:08:54.980 --> 00:08:56.340
Christine Herndon: Happen Zara.

61
00:08:58.660 --> 00:08:59.560
Thommy Reyes: Hello, Ben.

62
00:09:01.380 --> 00:09:03.719
Ben Zara Minkin: Hey guys, how are you?

63
00:09:05.650 --> 00:09:08.770
Ben Zara Minkin: Just as I was swallowing my… Fruit and yogurt.

64
00:09:10.800 --> 00:09:13.760
Thommy Reyes: Ever so healthy, with your meals. Good job.

65
00:09:13.760 --> 00:09:14.650
Ben Zara Minkin: Trying.

66
00:09:17.200 --> 00:09:17.970
Christine Herndon: Ash.

67
00:09:19.770 --> 00:09:21.389
Ben Zara Minkin: Hey Ash, everyone. Hey Max.

68
00:09:21.390 --> 00:09:21.970
Thommy Reyes: you.

69
00:09:21.970 --> 00:09:22.470
Ash Asaro: Yeah.

70
00:09:24.390 --> 00:09:25.320
Ben Zara Minkin: What's up, Paul?

71
00:09:26.320 --> 00:09:27.490
Paul Cassidy: Hello, everyone.

72
00:10:00.100 --> 00:10:07.749
Ben Zara Minkin: My son just, or my wife just texted me that our 10 year old today told her this morning that today she looks like a real mom.

73
00:10:07.750 --> 00:10:12.659
Christine Herndon: What does that mean?

74
00:10:12.660 --> 00:10:13.220
Ben Zara Minkin: the.

75
00:10:13.220 --> 00:10:14.060
Thommy Reyes: You know why?

76
00:10:14.710 --> 00:10:19.799
Ben Zara Minkin: No, I just said, why? What was the difference? But I think that's funny.

77
00:10:19.800 --> 00:10:22.749
Emily Risk: It is funny. I wanna know why, too.

78
00:10:24.130 --> 00:10:24.600
Ben Zara Minkin: Adieu.

79
00:10:24.600 --> 00:10:26.240
Thommy Reyes: Yes, we need an update on that, Ben.

80
00:10:26.640 --> 00:10:27.410
Christine Herndon: Hehehe.

81
00:10:38.780 --> 00:10:39.930
Ben Zara Minkin: How you doing, Emily?

82
00:10:40.100 --> 00:10:45.909
Emily Risk: Pretty good! It's getting busy over here in the new space. The students have found us, which is great.

83
00:10:46.230 --> 00:10:47.139
Ben Zara Minkin: That is great.

84
00:10:48.320 --> 00:10:51.680
Ben Zara Minkin: Are you booked pretty solid throughout the day, or what is it like?

85
00:10:52.170 --> 00:10:56.990
Emily Risk: Yep, pretty booked. And then we do have walk-ins, especially with the flu shots stuff going on. So.

86
00:10:56.990 --> 00:10:57.880
Ben Zara Minkin: good.

87
00:10:58.100 --> 00:10:58.690
Emily Risk: Yeah.

88
00:10:59.440 --> 00:11:00.830
Paul Cassidy: Usually staff, right?

89
00:11:01.860 --> 00:11:06.340
Emily Risk: Staff, students, all of it, yeah, haven't seen, you know, get over here.

90
00:11:06.750 --> 00:11:08.020
Emily Risk: Tell everybody.

91
00:11:09.440 --> 00:11:10.599
Ben Zara Minkin: I just got mine.

92
00:11:10.820 --> 00:11:12.090

Emily Risk: You did? Good job.

93
00:11:12.090 --> 00:11:12.780
Ben Zara Minkin: Thanks.

94
00:11:16.340 --> 00:11:19.749
Paul Cassidy: We are waiting for a quorum, so we need a couple more people.

95
00:11:21.780 --> 00:11:23.359
Ben Zara Minkin: Vince and I don't count, right?

96
00:11:23.500 --> 00:11:24.300
Ben Zara Minkin: Paul.

97
00:11:24.910 --> 00:11:29.010
Paul Cassidy: Your you your presence is essential.

98
00:11:29.400 --> 00:11:32.639
Paul Cassidy: But, you're not voting members of the committee.

99
00:11:32.640 --> 00:11:34.850
Ben Zara Minkin: That's okay, you can tell us that we don't count, I'm fine.

100
00:11:34.850 --> 00:11:35.640
Vince Garcia: I.

101
00:11:35.640 --> 00:11:36.880
Paul Cassidy: I wouldn't say you don't count.

102
00:11:36.880 --> 00:11:37.630
Vince Garcia: Sure.

103
00:11:39.150 --> 00:11:40.080
Emily Risk: Harsh.

104
00:11:40.460 --> 00:11:46.869
Melissa Komadina: Hi, everyone! I'm here, and I don't think I'm a voting member unless I can be, but, I…

105
00:11:47.420 --> 00:11:52.999
Melissa Komadina: think I'm here as a result of Lindsey, maybe, was on this committee prior? Is that a true statement?

106
00:11:53.200 --> 00:11:55.759
Melissa Komadina: Since I'm sitting in Lindsay's seat. Hi, everyone.

107
00:11:55.900 --> 00:11:59.319
Paul Cassidy: For strategic…

108
00:11:59.570 --> 00:12:03.819
Melissa Komadina: Yes, SPWD, I don't know if SPWD had any representation.

109
00:12:04.780 --> 00:12:05.870
Paul Cassidy: I'm checking right now.

110
00:12:05.870 --> 00:12:06.910
Melissa Komadina: All right, thanks.

111
00:12:07.180 --> 00:12:08.240
Melissa Komadina: And if, if…

112
00:12:08.240 --> 00:12:09.879
Paul Cassidy: Amber Gouges, if I'm saying that.

113
00:12:09.880 --> 00:12:12.369
Melissa Komadina: And was Amber here last time?

114
00:12:13.170 --> 00:12:14.130
Paul Cassidy: No.

115
00:12:14.360 --> 00:12:28.600
Melissa Komadina: Okay, so I think this was brought up at our division meeting last month, and so there would seem to be a space. So, okay, so is there a process by which I need to formalize putting myself slash Lindsay on?

116
00:12:29.540 --> 00:12:34.070
Paul Cassidy: I can make the change, but you're a voting member. She… Okay.

117
00:12:34.070 --> 00:12:34.900
Melissa Komadina: Voting member.

118
00:12:34.900 --> 00:12:36.410
Paul Cassidy: Capacity is voting, so…

119
00:12:36.410 --> 00:12:37.890
Melissa Komadina: Okay, sounds good, thank you.

120
00:12:37.890 --> 00:12:38.450
Paul Cassidy: Yep.

121
00:12:52.270 --> 00:12:54.829
Paul Cassidy: Very, resource rich today.

122
00:12:55.250 --> 00:12:58.000
Paul Cassidy: So, resource would be non-voting member.

123
00:12:58.440 --> 00:13:00.190
Paul Cassidy: And, pretty good turnout.

124
00:13:03.100 --> 00:13:05.789
Paul Cassidy: All right, I think Nadia gives us quorum.

125
00:13:07.660 --> 00:13:08.880
Paul Cassidy: Welcome, Nadia.

126
00:13:09.190 --> 00:13:10.570
Paul Cassidy: Should've said that first.

127
00:13:10.570 --> 00:13:11.320
Nadia Tariq (she/her/hers): you.

128
00:13:16.410 --> 00:13:17.190
Paul Cassidy: All right.

129
00:13:28.950 --> 00:13:33.009
Paul Cassidy: All right, everyone, can you see today's agenda?

130
00:13:33.510 --> 00:13:34.230
Emily Risk: Yes.

131
00:13:34.400 --> 00:13:43.779
Paul Cassidy: I… this is the October 1st meeting of the Campus Health, Safety, and Emergency Preparedness Committee meeting.

132
00:13:43.840 --> 00:14:01.889
Paul Cassidy: And we usually start off by summarizing the gathering space norms, which is, we can disagree, but let's not be disagreeable. And then we will move to the first item, which is to approve today's agenda. I need a first…

133
00:14:01.980 --> 00:14:06.839
Paul Cassidy: I need a motion to consider today's agenda.

134
00:14:10.110 --> 00:14:12.100
Paul Cassidy: So, if somebody could say.

135
00:14:12.410 --> 00:14:13.380
Paul Cassidy: iMotion, or…

136
00:14:13.380 --> 00:14:15.020
Will Minnich (he, his, him): Motion motion.

137
00:14:15.200 --> 00:14:17.800
Paul Cassidy: Thank you. And then I need a second.

138
00:14:17.800 --> 00:14:18.350
Jewel Rosetes: I second.

139
00:14:18.350 --> 00:14:19.240
Clair Yeo-Sugajski (she/她): Second.

140
00:14:19.240 --> 00:14:27.950
Paul Cassidy: Thank you, thank you. All right, all in favor of today's agenda, if you could just raise the hand function, usually works the best. Thank you.

141
00:14:30.660 --> 00:14:31.780
Paul Cassidy: Looking good.

142
00:14:34.920 --> 00:14:36.050
Paul Cassidy: Looking great.

143
00:14:37.310 --> 00:14:38.220
Paul Cassidy: Okay.

144
00:14:38.470 --> 00:14:51.470
Paul Cassidy: If you could put your hand down now. And then if anyone would like to, not approve today's, agenda, please raise your hand now, or say something.

145
00:14:54.060 --> 00:15:01.359
Paul Cassidy: Don't see anything. If anyone is abstaining from considering today's agenda, Put your hand up now.

146
00:15:02.560 --> 00:15:04.760
Paul Cassidy: if you would. Thank you.

147
00:15:04.800 --> 00:15:23.659
Paul Cassidy: Thank you. All right, today's agenda is approved. Thanks, everybody. And then the second item here is the meeting notes for, last September, which are available on the website, as well as were circulated for the meeting invite. Can I have a motion to, consider those?

148
00:15:26.620 --> 00:15:27.760
Melissa Komadina: I'll motion.

149
00:15:28.140 --> 00:15:29.890
Paul Cassidy: Thanks, Melissa. Second?

150
00:15:29.890 --> 00:15:30.920
Christine Herndon: Hi, Second.

151
00:15:31.160 --> 00:15:36.390
Paul Cassidy: Thank you, Christine. All right, all in favor of approving.

152
00:15:36.890 --> 00:15:41.829

Paul Cassidy: The meeting notes for last month, if you could raise your hand now.

153
00:15:45.980 --> 00:15:46.730
Paul Cassidy: Great.

154
00:15:47.110 --> 00:15:47.940
Paul Cassidy: Great.

155
00:15:48.200 --> 00:15:49.449
Paul Cassidy: Thank you, everybody.

156
00:15:49.600 --> 00:15:57.749
Paul Cassidy: All right, you can put your hand down now. And then, anyone who does not approve, if you could indicate so right now.

157
00:16:01.340 --> 00:16:03.840
Paul Cassidy: Don't see anything. Anyone abstaining?

158
00:16:05.750 --> 00:16:06.440
Paul Cassidy: No.

159
00:16:06.690 --> 00:16:17.970
Paul Cassidy: Okay, thank you everyone. We will move to the health center update and joining us today is Emily Risk. So Emily, take it away. Thank you.

160
00:16:17.970 --> 00:16:18.880
Emily Risk: Okay.

161
00:16:19.040 --> 00:16:26.700
Emily Risk: Hey there, everybody. So, not a whole lot of new updates since, Judith's update last

162
00:16:26.780 --> 00:16:31.000
Emily Risk: The health fair is October 14th from 10 to 2.

163
00:16:31.010 --> 00:16:43.400
Emily Risk: We have 28 vendors that are secured so far, and I guess the biggest deal is that we have free flu shots in right now, and they're free to all students, faculty, and community members.

164
00:16:43.400 --> 00:16:53.259
Emily Risk: We will be giving them out during the health fair as well. We have students from San Francisco State that will be administering the flu vaccine at the health fair.

165
00:16:53.270 --> 00:17:01.220
Emily Risk: And then November 11th, we have our blood drive, and that'll be from 10 to 3, and during the health fair, you can sign up for the blood drive.

166
00:17:02.640 --> 00:17:05.140
Emily Risk: And that is the scoop for right now.

167
00:17:06.730 --> 00:17:08.129
Paul Cassidy: Thank you so much, Emily.

168
00:17:08.349 --> 00:17:12.670
Paul Cassidy: Next up is our friend Max Warne.

169
00:17:13.190 --> 00:17:14.150
Paul Cassidy: Hi, Max. Thank you.

170
00:17:14.150 --> 00:17:15.160
Max Warne: Hi, everyone!

171
00:17:15.569 --> 00:17:27.019
Max Warne: Thanks, Paul. Let's see, first thing, just wanted to touch on the EV chargers. I know we always have a lot of issues with the charging stations, either being down.

172
00:17:27.020 --> 00:17:36.240
Max Warne: Out of service, so, I'm having my team, make rounds every single morning. As soon as they get into the office, I have somebody go around.

173
00:17:36.260 --> 00:17:48.150
Max Warne: Check every single charging unit and report back, any major issues, just so we have some time in the morning to troubleshoot just before folks start showing up and plugging in.

174
00:17:48.220 --> 00:18:08.000
Max Warne: We do have an issue in the Lot G charger. It's the newest one that's been installed by our team. There is an issue with the wiring, so we're trying to troubleshoot it with, between ChargePoint and our team, so just please bear with us while we try and figure out what's going on with that one.

175
00:18:08.410 --> 00:18:22.080
Max Warne: There is a Schneider Electric charging unit that's next to it that is operational. We will be upgrading that one to a ChargePoint unit as well, but we want to get the other unit up and running before we take the other one offline.

176
00:18:22.880 --> 00:18:31.550
Max Warne: I did have a report of some lighting issues, mainly B1 during power outages in the restrooms.

177
00:18:31.670 --> 00:18:42.740
Max Warne: I did have my team investigate that. So in those restrooms, the strategy when we did the facelift was to add what we call bug eye lights.

178
00:18:43.260 --> 00:19:00.929
Max Warne: They're not the brightest lighting system, but they are compliant. Our code for compliance is a one-foot candle for emergency lighting, and I've had my team go check every restroom in Building 1, and every single one is working.

179
00:19:01.110 --> 00:19:10.529

Max Warne: There is one room, and it's not really a public restroom, but it's in the green room, which is part of the theater, and we will be installing bug eye lights in that restroom.

180
00:19:12.560 --> 00:19:23.680
Max Warne: As far as lighting around campus and the perimeter of it, I'm gonna do an assessment. There was a report that, you know, some of the outer areas of the campus and certain parking lots are dark.

181
00:19:24.350 --> 00:19:41.649
Max Warne: So I'm going to spend some time investigating and see where we can kind of bridge the gaps in those areas. The one area that I do know about that's on our radar and we are making, arrangements and plans to, address it is the lot T, Shelton Lane behind building 19.

182
00:19:42.230 --> 00:19:46.560
Max Warne: We're just looking to see where we can tie in some lights just to brighten that area up.

183
00:19:47.770 --> 00:19:53.490
Max Warne: I wanted to give everybody a heads up on some upcoming projects and construction that will be happening.

184
00:19:53.700 --> 00:19:59.780
Max Warne: We have over winter break, building six, we're going to be changing out the chiller unit that's on the roof.

185
00:20:00.320 --> 00:20:15.690
Max Warne: So if you're on campus for some reason during that time, you're gonna see a lot of work happening. And then, our boiler room, we're in the design phase right now, but we'll start breaking ground here in the near future in Lot D for the new boiler room.

186
00:20:17.180 --> 00:20:19.379
Max Warne: Anybody have any questions?

187
00:20:21.330 --> 00:20:23.220
Max Warne: All right. Thank you.

188
00:20:24.080 --> 00:20:31.420
Paul Cassidy: Thank you, Max. Next up is our public safety team. I'd like to introduce Tommy.

189
00:20:31.420 --> 00:20:46.020
Paul Cassidy: Reyes, who is, taking over, for Jim Vangely, who is on this call, and has stepped in at CSM. I'm not sure who wants to…

190
00:20:46.300 --> 00:20:48.160
Paul Cassidy: Talk first, yeah.

191
00:20:48.160 --> 00:20:48.880
Thommy Reyes: Well, I…

192
00:20:48.880 --> 00:20:57.099
Will Minnich (he, his, him): I had one question for Max. Sorry about that. I was trying to get off mute. Max, where's the new boiler going? Is it replacing the current one or is it in addition to what we already have?

193
00:20:57.100 --> 00:20:57.580
Thommy Reyes: Ugh.

194
00:20:57.580 --> 00:21:06.229
Max Warne: Yeah, so it's, it's going to fully replace, so right now, if folks aren't aware, our boiler room is located inside of Building 1.

195
00:21:06.230 --> 00:21:21.690
Max Warne: So we're completely removing and abandoning what's in place in building one and building an entirely new plant in lot D. Currently in lot D, there's some large planters, those will get removed, and the the boiler room will will be.

196
00:21:21.690 --> 00:21:24.969
Max Warne: Tuck in tight up against the backside of Building 3.

197
00:21:25.680 --> 00:21:34.299
Max Warne: So, entirely new boiler plant, completely new system, it'll be 3… 3 new boilers, we currently have 2, and

198
00:21:34.630 --> 00:21:44.989
Max Warne: Yeah, all new equipment, It'll be backup power ready, so during power outages, we should be able to at least keep the water… hot water circulating through campus.

199
00:21:47.970 --> 00:21:49.939
Paul Cassidy: Nadia, I see your hand is up.

200
00:21:50.180 --> 00:22:05.460
Nadia Tariq (she/her/hers): I'm like Will, right, trying to catch and raise my hand. I have also a question for Max. Max, for follow-up, is it possible, is it still up for adding additional lights to the areas in the buildings that can really get dark during power outages?

201
00:22:06.500 --> 00:22:23.249
Max Warne: Yeah, so… We can add extra emergency lights for power outages, we just have to identify the areas that need it the most. So if… Folks see any areas, please reach out to me directly, and we can… we can assess it and see what we can do.

202
00:22:24.020 --> 00:22:39.479
Nadia Tariq (she/her/hers): Absolutely. Like, I was like, again, we had a couple of them, right? So, I have noticed, personally, between building in 7, 8, right, like, those areas that do not have windows or sunlight coming through, and those areas can get very dark.

203
00:22:39.710 --> 00:22:47.829
Nadia Tariq (she/her/hers): Yes. Right? So, like, there are some spots that, unless you are using your cell phone light, you don't know where you're walking.

204
00:22:48.630 --> 00:22:49.390
Max Warne: Understood.

205
00:22:49.390 --> 00:22:51.130

Nadia Tariq (she/her/hers): But I will reach out to you.

206
00:22:51.130 --> 00:22:54.449
Max Warne: Okay, thank you, appreciate it. Yeah, any feedback is welcome.

207
00:22:57.300 --> 00:22:58.390
Paul Cassidy: Thank you, Nadia.

208
00:22:58.820 --> 00:23:01.719
Paul Cassidy: Thank you, Max. All right.

209
00:23:01.720 --> 00:23:03.709
Thommy Reyes: All right. For public safety?

210
00:23:04.180 --> 00:23:07.500
Thommy Reyes: Hello guys, I'm the new guy here.

211
00:23:07.660 --> 00:23:16.190
Thommy Reyes: You know, this is only my second week being back to the morning shift, and it's been good, it's been smooth, you know?

212
00:23:16.340 --> 00:23:21.009
Thommy Reyes: Obviously, the same model still stands in terms of public safety's focus.

213
00:23:21.140 --> 00:23:24.020
Thommy Reyes: On being visible and accessible,

214
00:23:24.290 --> 00:23:39.130
Thommy Reyes: I think that, you know, having, you know, we haven't had too many problems, but I think especially at nighttime, we want to maintain the visibility part, where our officers, you know, do patrol regularly, foot patrol and vehicle patrol.

215
00:23:39.340 --> 00:23:46.249
Thommy Reyes: In light of the weather change and getting darker now, that's important, especially during the rush hours between 6 and 7.

216
00:23:46.410 --> 00:23:54.000
Thommy Reyes: 9 and 10 to be around and be… to be seen. For anyone that needs help, we are probably expecting more

217
00:23:54.180 --> 00:23:57.869
Thommy Reyes: Request for jump starts and whatnot.

218
00:23:58.120 --> 00:24:06.130
Thommy Reyes: And other than that, I, you know, I will do, you know, I will pass it on to Brandon, if he has something else to add for during the day.

219
00:24:06.390 --> 00:24:11.029

Thommy Reyes: Since, you know, he's the… our regular, daytime officer. Brandon?

220
00:24:11.840 --> 00:24:13.090
Brandon Becerra: Thank you, LT.

221
00:24:13.250 --> 00:24:17.239
Brandon Becerra: And welcome to Day Shift. Hi, everybody.

222
00:24:17.330 --> 00:24:21.760
Brandon Becerra: So, for public safety, our overall goal is continuing maintaining safe

223
00:24:21.770 --> 00:24:38.559
Brandon Becerra: an organized campus environment, and what we want to do is basically continue our community outreach. Jeremy and I, we're always going out, we're checking the buildings, we're going to all our buildings, we're having our open door policy, we're encouraging students to come see us if they have any concerns.

224
00:24:38.560 --> 00:24:47.079
Brandon Becerra: And it's been working. It's very positive. Students are now approaching us just to say, hey, what's up? And that's something very new to public safety, and we really like that.

225
00:24:47.080 --> 00:24:59.860
Brandon Becerra: We have our students from Building 14, our little ones, they come and visit us and we give them stickers. So we're really trying to encourage that open door, welcoming arms for our faculty, staff and students.

226
00:25:02.530 --> 00:25:21.650
Brandon Becerra: We are continuing our parking enforcement and there's been huge improvements with these new staff signs. It's been wonderful. We're not writing as many citations because the students are learning, they're seeing the signs. We still need to coordinate with facilities on getting more staff parking signs in Lot M. That's the big one for us.

227
00:25:21.680 --> 00:25:32.710
Brandon Becerra: And hopefully, in the future, we can get that going. And besides all of that, we're also monitoring our buildings, making sure there's no spills, and if we do see any spills or any campage damage.

228
00:25:32.750 --> 00:25:46.769
Brandon Becerra: We contact facilities immediately just to let them know so we can maintain the safety of all of our buildings so nobody slips and falls or gets hurt, and it's just to avoid any damage. And that's all I have for Public Safety Day shift.

229
00:25:47.310 --> 00:26:04.519
Thommy Reyes: If I can add something real quick, I must compliment both Jeremy and Brandon. I'm very ecstatic and happy to be back home, as Scotland is my home base. You know, I don't want to sound like a homer, but obviously I have been to all three campuses, but…

230
00:26:04.620 --> 00:26:23.509
Thommy Reyes: I must say that the team at Skyline is the most solid. They really believe strongly in that, in that accessibility for students as they walk around, develop relationships with the students, and that works really, really well. Also, on the other hand.

231
00:26:23.770 --> 00:26:29.570

Thommy Reyes: You know, as has been for many, many years, decades, you know, we work really well with facilities.

232
00:26:29.680 --> 00:26:40.290
Thommy Reyes: Thank you to Max. As we, you know, as we are on… on the field and observe and see things, we obviously immediately

233
00:26:40.420 --> 00:26:56.329
Thommy Reyes: report to facilities, one of which, for example, is the last couple of days, there was a broken sprinkler, and our SWISHF guys immediately contacted facilities and reported that. So, we make a really good team here, so I'm very happy to be back.

234
00:26:57.500 --> 00:26:58.429
Brandon Becerra: Thank you, LT.

235
00:26:58.900 --> 00:27:00.160
J Vangele: Hello, everybody.

236
00:27:00.930 --> 00:27:21.839
J Vangele: you guys are in good hands with Tommy, Brandon, and the rest of the team while I'm temporarily at CSM. In the meantime, just to make sure everything gets covered, when you need something, please reach out to Tommy and me. Keep us both in the loop. I also don't want to have, you know, be… have a knowledge gap when I come back to Skyline in terms of…

237
00:27:21.840 --> 00:27:26.170
J Vangele: you know, things happened that I didn't know about, during the transition time.

238
00:27:26.280 --> 00:27:43.270
J Vangele: So, yeah, just when you reach out, reach out to Tommy, but also reach out to me, you know, in emails and texts and all that kind of, you know, group emails, group texts, all that sort of thing, so that we both stay in the loop, and then we'll both make sure that, you get whatever you need.

239
00:27:43.530 --> 00:27:53.939
J Vangele: So… Thank you for your patience during this time, but I can guarantee you that things will continue on effectively as they always have.

240
00:27:56.470 --> 00:28:00.870
Paul Cassidy: Thank you, Jim. Appreciate that. Christine, did your hand come up for there a little bit?

241
00:28:00.870 --> 00:28:25.840
Christine Herndon: It did. I was just gonna kind of echo what Tommy was talking about and say here at Billing 14, public safety and facilities are always thinking of us and always keep them, keep us at the top of their list as far as priority for anything that we need to know that happens on campus, and they're always checking in on us, so we always appreciate everything that public safety and facilities does for us.

242
00:28:25.840 --> 00:28:27.150
Christine Herndon: So thank you.

243
00:28:28.200 --> 00:28:29.660
Paul Cassidy: Thank you, Christine Nadia.

244
00:28:29.660 --> 00:28:30.570
Thommy Reyes: Good question.

245
00:28:30.810 --> 00:28:31.350
Paul Cassidy: Yep.

246
00:28:31.350 --> 00:28:31.860
Brandon Becerra: Thank you.

247
00:28:31.860 --> 00:28:32.570
Paul Cassidy: Your hand up.

248
00:28:32.810 --> 00:28:39.109
Nadia Tariq (she/her/hers): Thank you. I was gonna have a follow-up question, and that may have been, my oversight.

249
00:28:39.300 --> 00:28:48.959
Nadia Tariq (she/her/hers): But I… Tommy and Brandon, if you can confirm, and Jim, when somebody dials 911 from their cell phone, does public safety get notified?

250
00:28:50.050 --> 00:28:51.480
J Vangele: No, we do not.

251
00:28:53.100 --> 00:29:11.759
Nadia Tariq (she/her/hers): Okay, so, I mean, I was gonna mention that that's an issue, then, that we need to figure out. There's been an incident recently where a new full-time faculty had to dial 911, and paramedics were on-site, they were treating the student, and

252
00:29:11.760 --> 00:29:25.920
Nadia Tariq (she/her/hers): again, like, he was a new faculty, so he did not know to call, like, public safety or notify someone, but I saw that, notified my dean, we went out to notify public safety to let them know there's paramedics on site.

253
00:29:25.980 --> 00:29:40.079
Nadia Tariq (she/her/hers): And again, now we know where the gap is. They were under the assumption that EMT students are basically practicing their, you know, hands-on practice. They did not know it was real paramedics on-site treating someone.

254
00:29:40.650 --> 00:29:48.970
J Vangele: Okay, yeah, I mean, we could potentially work with, MCPR to get a message out. I mean, 911 is a higher threshold

255
00:29:48.970 --> 00:30:12.850
J Vangele: than public safety in terms of, you know, what they can provide and the services and so forth. So, there's no safety issue in regards to that. Calling 911 is, you know, Tier 1, top-level, emergency care, so, everybody's gonna be just as safe. Probably an educational thing would be to let people know, and what we always tell people is call 911.

256
00:30:13.300 --> 00:30:24.600

J Vangele: get the, you know, emergency services en route, and then when it's safe to do so, and you have time, call public safety. But, for example, if somebody.

257
00:30:24.600 --> 00:30:42.610
J Vangele: You know, if you see a violent intruder or something like that, the main thing is get 911, you know, get that going first. If you can call public safety, great, but it's far more important to get police en route and let the emergency responders. Plus, dispatch is really good at San Bernardino.

258
00:30:42.720 --> 00:31:04.290
J Vangele: So, if it's something, you know, really serious like that, they'll call Public Safety themselves, a lot of the times, and let us know what's going on. So, yeah, and then, you know, everybody could do their part to share with everybody in your division, everybody in your office, everybody you work with, that, hey, if you call 911 when it's safe to do so, and you have time, please call

259
00:31:04.330 --> 00:31:11.669
J Vangele: public safety after you've called 911. So, but we can work on education on that going down the road.

260
00:31:12.000 --> 00:31:26.540
Nadia Tariq (she/her/hers): And I think if you can, maybe that's a clarification message that can be published somewhere that because we were told that when we dialed by accident 911 from our office phone, right, public safety get notification.

261
00:31:26.540 --> 00:31:29.040
J Vangele: That is true. That, that, that works, but…

262
00:31:29.040 --> 00:31:36.960
Nadia Tariq (she/her/hers): So we were under the assumption that when somebody does the same thing on their cell phone, maybe San Bruno PD notified Public Safety automatically.

263
00:31:36.960 --> 00:31:47.429
J Vangele: No. So, we can… the district can control district phones. The district cannot control people's individual private cell phones, so that's… that's the difference.

264
00:31:47.610 --> 00:32:01.559
Nadia Tariq (she/her/hers): So that's what I was going to mention, that maybe when we do send out that educational message, somehow, some way, we can all be informed, saying just dialing 911 from your cell phone does not notify

265
00:32:01.560 --> 00:32:08.909
Nadia Tariq (she/her/hers): the college or the district or dispatcher. So they need to follow through with their second step by calling public safety.

266
00:32:09.130 --> 00:32:09.940
J Vangele: Correct.

267
00:32:10.460 --> 00:32:25.459
Thommy Reyes: If I can just add, I mean, you know, for example, I just looked on my phone, we got an alert, for example, not to put Kwame on the thing here, but there was a 911 call today, 1133, from Kwame Thomas, and that was emailed to us as an alert.

268
00:32:25.610 --> 00:32:32.630

Thommy Reyes: And I believe, Jim, correct me if I'm wrong, that dispatch will also get a copy of this alert.

269
00:32:36.100 --> 00:32:36.880
Thommy Reyes: Jim?

270
00:32:43.600 --> 00:32:50.370
Thommy Reyes: So, okay, on that note, Brandon, did you get the alert today from, from Kwame at 1133?

271
00:32:55.380 --> 00:33:12.829
Brandon Becerra: So, we got the alert on the TV. Right. Cell phone reception currently at Skyline. Our duty funds are delaying a little bit, receiving those messages, but they do eventually come in. They're not coming in automatically like we want them to, but we do get immediate responses on the television.

272
00:33:15.570 --> 00:33:19.689
Thommy Reyes: So, so Nadia also, you know, the staff was just aware, you know, to…

273
00:33:19.890 --> 00:33:23.709
Thommy Reyes: To also dial 7000 for our dispatcher, yes? Okay.

274
00:33:24.740 --> 00:33:44.510
J Vangele: And I can also add that, temporarily, it's, it's a little, we're also going through a transition period with the phone system, so we're transferring from Mitel to Zoom Phone. Zoom Phone is tremendously better than Mitel. Mitel's outdated, they're not providing the same support that they once did.

275
00:33:44.640 --> 00:34:08.149
J Vangele: Zoom is the new, greatest, latest thing. So, once District has transferred over to Zoom Phone, which is supposed to happen by January, all the phone systems are going to be working a lot better and a lot more efficiently, and you'll have a lot more, resources and tools to use your phone. You'll have your own individual account that you can log in online.

276
00:34:08.290 --> 00:34:27.080
J Vangele: You can set your individual phone settings, you can call… make calls from your computer, iPad, phone, whatever it is, but there's gonna be tremendous enhancements to the district-wide phone system once Zoom has taken the place of Mitel, so it's… whatever's going wrong now is gonna get fixed.

277
00:34:32.710 --> 00:34:33.470
Paul Cassidy: All right.

278
00:34:33.860 --> 00:34:47.899
Paul Cassidy: Thank you, Jim. Thank you, Tommy. Thank you, Brandon. One thing, that I would just add, that we kind of remind everybody every year as it's getting darker earlier, is there's a escort service. Is that right, Jim? So if somebody is worried about going.

279
00:34:47.900 --> 00:34:48.460
Thommy Reyes: Yes.

280
00:34:48.460 --> 00:34:51.620
Paul Cassidy: A dark area of a parking lot.

281

00:34:53.179 --> 00:34:57.360
Paul Cassidy: You can call for $7,000, and

282
00:34:58.270 --> 00:35:00.510
Paul Cassidy: Public Safety would be happy to help.

283
00:35:00.780 --> 00:35:06.579
Thommy Reyes: Yes, our dispatcher work until 10 o'clock at night, so anytime before that, just call the 7000 number.

284
00:35:06.690 --> 00:35:12.229
Thommy Reyes: And he he will then dispatch an officer for the escort service.

285
00:35:14.130 --> 00:35:19.250
Paul Cassidy: Thank you, Tommy. All right, Ben Zara, I think you're up.

286
00:35:20.040 --> 00:35:23.730
Ben Zara Minkin: Okay, cool. Quick review.

287
00:35:23.930 --> 00:35:27.330
Ben Zara Minkin: We all did the violent intruder drill.

288
00:35:27.460 --> 00:35:42.169
Ben Zara Minkin: I was about ready to call it the Lockdown Barricade Drill. The violent intruder drill, it went really well. We've… we have a help ticket in with Rave, because the EAS repeated twice, which isn't that bad as long as the message is getting through.

289
00:35:42.310 --> 00:35:44.660
Ben Zara Minkin: We know that…

290
00:35:44.990 --> 00:35:51.580
Ben Zara Minkin: Rave called the system twice, and that's why we think that maybe the first time it called, there was a busy…

291
00:35:51.750 --> 00:35:58.029
Ben Zara Minkin: signal on the line. There's it goes through a Uti, which is a uniform universal telephone interface. When

292
00:35:58.260 --> 00:36:15.869
Ben Zara Minkin: It calls from our notification company to our, alert system, our PA system, and so that was, why, if you were here for the drills during the morning and the evening at Skyline, you've heard it twice. On the other two campuses, it, functioned as desired.

293
00:36:15.870 --> 00:36:18.630
Ben Zara Minkin: We had really good feedback for the drills.

294
00:36:19.000 --> 00:36:33.599
Ben Zara Minkin: we've created flyers now for everybody to go over our Run, Hide, Fight paradigm, and we also, have instructions on how to enroll in our RAVE system, which is… are things that we're required to do by law. We're required to tell people, not just our students and employees, but

295
00:36:33.600 --> 00:36:40.049
Ben Zara Minkin: How it is that we will communicate to them if there's an emergency happening on one of our campuses, and as many of you know.

296
00:36:40.080 --> 00:36:46.769
Ben Zara Minkin: The cell signals are, poor up at Skyline, and so, depending on where you are, you might not

297
00:36:46.840 --> 00:36:55.389
Ben Zara Minkin: Get the alerts to your phone, and they might only come over the speaker, so it's important that we have both of those modalities to communicate.

298
00:36:56.110 --> 00:37:00.910
Ben Zara Minkin: Our next drill is October 15th, it's our, great shakeout drill.

299
00:37:00.940 --> 00:37:16.740
Ben Zara Minkin: I'm glad that we have Tommy and, Jim on these calls. They're going… Jim and Tommy are going to reach out to the battalion… or the battalion chiefs, the building captains on, at Skyline and at CSM to make sure that

300
00:37:17.150 --> 00:37:21.889
Ben Zara Minkin: All of our building captains are prepared for the evacuation that comes with the Great Shakeout.

301
00:37:22.080 --> 00:37:29.560
Ben Zara Minkin: The drill's gonna be at 1045 on that Thursday, on the 15th, October 15th, so just about 2 weeks away.

302
00:37:29.770 --> 00:37:32.050
Ben Zara Minkin: Two weeks exactly from today.

303
00:37:32.100 --> 00:37:51.989
Ben Zara Minkin: And we're not doing it at 10.15 in the morning, we're doing it at 10.45 in the morning. We do know that it's the end of the class, so once people evacuate, they pretty much will not be going back to class. The drill is only going to last 10 minutes total, so about 1 minute for the drop cover and hold on, which is where everybody will get underneath their desk, or…

304
00:37:52.150 --> 00:38:09.059
Ben Zara Minkin: If they're in desks where they can't get into, they'll just shield their heads with their arms like this. And then we want to confirm within those spaces that everybody is receiving those emergency alerts to their phone, and then there's going to be another alert that comes out over the PA system and over your phones that says to evacuate.

305
00:38:09.480 --> 00:38:29.139
Ben Zara Minkin: If you're evacuating your building, you want to go out the most proximal, egress location in your building. You don't want to go and look at a map and see that a line goes past a door and then walk through your building to get out that door. We want to get out of the building as quickly as possible. Once you're to the outside of the building, a lot of people

306
00:38:29.480 --> 00:38:47.170

Ben Zara Minkin: are wondering and have asked questions like, which, evacuation assembly area do I need to go to? Is there a particular one that's assigned to me if I'm in this building, or if I'm in this spot? And the answer is no. Our emergency assembly areas, or evacuation assembly areas on the outside of our buildings.

307
00:38:47.230 --> 00:39:01.000
Ben Zara Minkin: are, supposed to be located at, a good height away from… away from our building, so if the building collapsed, you don't want to be standing there in the collapse zone. So, even if you're not gonna go to, one of those evacuation

308
00:39:01.350 --> 00:39:13.039
Ben Zara Minkin: assembly areas, just go to about twice the height of the building away, and stage there. We don't want you evacuating the building and then just, you know, leaning up against the outside of the building, and if

309
00:39:13.070 --> 00:39:32.070
Ben Zara Minkin: You're a building captain, I see you in here, Emily, and you have people evacuating out of the new building, too. You're gonna have, you know, your backpack on, and you're gonna have your vest on, and you're gonna have your radio in your hand, and you're gonna want to take a hot lap around that building, a 360 around it, and you're just gonna be telling people, hey, I need you to stand further away from the building.

310
00:39:32.070 --> 00:39:35.429
Ben Zara Minkin: We're practicing as if this was a real earthquake, and

311
00:39:35.610 --> 00:39:45.810
Ben Zara Minkin: We don't know how stable the building would be after an earthquake, so we want you guys out of the collapse zone. This whole drill will be over in about 10 minutes, just communicate to them, and once you get everybody out of that building, Emily.

312
00:39:45.810 --> 00:39:56.350
Ben Zara Minkin: You want to radio to Tommy? You're going to do that on the local safety channel, which is channel two on your radio. And it should just say Skyline. Skyline safety.

313
00:39:56.480 --> 00:40:13.969
Ben Zara Minkin: And then you're just gonna tell Tommy, hey Tommy, this is Emily over in Building 2, I'm the building captain here, our building has been evacuated. Once Tommy hears from all of the building captains and from his officers, he's gonna know where all of you are, because we want our campus captains to pre-plan with our building captains.

314
00:40:14.130 --> 00:40:23.939
Ben Zara Minkin: Once he gets everyone, all of those buildings cleared, he's gonna then radio dispatch, and he's gonna radio dispatch on his own radio, which is channel 1 on his own radio, to say.

315
00:40:24.220 --> 00:40:30.280
Ben Zara Minkin: dispatch, this is Tommy, all of Skyline has been evacuated, we can confirm that.

316
00:40:30.280 --> 00:40:54.519
Ben Zara Minkin: And we're going to be doing that on 3 different campuses at the same time, and so each one of our campuses will be on their own channel. That way, you don't have to worry, Emily, about a building captain and building 2 on a different campus, saying that they've been evacuated, and then having dispatch confuse it. We don't have to… you don't have to tell Tommy which campus you're on, because Tommy's only going to be hearing building captains.

317

00:40:54.540 --> 00:41:05.950
Ben Zara Minkin: that are located out on the Skyline campus. I see you in here, too, as well, Sherry. So you want to make sure that upstairs there, you're getting, you know, the president and everybody out.

318
00:41:06.340 --> 00:41:19.740
Ben Zara Minkin: Just let them know. And we want to be polite. We just want to be systematic in how we approach people. And we have to practice like it's real, because in a real emergency, even real earthquakes, there's going to be people that refuse to leave.

319
00:41:19.740 --> 00:41:34.420
Ben Zara Minkin: And we're not gonna force them, we're not going to get in an argument with anybody, we're just gonna tell them, hey, it's required that you leave, and then you're gonna move on, and you're gonna continue that systematic evacuation, working your way down, you're on the top floor there, Sherry.

320
00:41:34.420 --> 00:41:42.880
Ben Zara Minkin: And then when you get on the outside, just let everybody know, hey, I'm gonna radio this in, we're gonna have an all-clear from this building, and then once we get an all-clear from the campus.

321
00:41:42.880 --> 00:41:54.290
Ben Zara Minkin: we'll be able to go back in. But wait until you hear that I can tell you guys that we can go back in. And that's really what we want, if we have a forced evacuation, because

322
00:41:54.470 --> 00:42:12.679
Ben Zara Minkin: What we don't want is our building captains to evacuate our buildings, and then migrate away from those entrance and egress areas, and then people just start walking back in, right? So if you evacuated everybody and you want to take a hot lap around that building, just grab a couple people that are by the door and say, hey.

323
00:42:12.720 --> 00:42:28.569
Ben Zara Minkin: You guys, you guys are in charge here. Don't let anybody back into this building through these doors until I get back here. We need to wait until we have the all clear. And just be communicating clearly like that will go miles. People inherently want to do the right thing when it comes to

324
00:42:28.570 --> 00:42:35.369
Ben Zara Minkin: The safety protocols, it's just people don't know, and, the ones that don't want to oblige, we, have

325
00:42:35.460 --> 00:42:40.350
Ben Zara Minkin: we have to worry about the greater good of everybody else. So in a true emergency, we would act that same way.

326
00:42:41.250 --> 00:42:44.829
Ben Zara Minkin: Any questions about the great shakeout drill?

327
00:42:45.810 --> 00:43:05.490
Ben Zara Minkin: Christine, we've done the fire drill there in your building. You know exactly where to go, it's the sign right across, from your area. But you'll… you can have, you know, separate your staff like we did in the fire drill, and just bring, you know, if you guys are in a different spot within the building at 1045, if… I don't know whether you're gonna pre-plan to all be in the same location, but…

328
00:43:05.490 --> 00:43:14.950
Ben Zara Minkin: Like in a real earthquake, you might have kids in, you know, different groups in different parts of the building. Have your staff evacuate the kids from the proximal, from the very close.

329
00:43:14.950 --> 00:43:26.880
Ben Zara Minkin: Exit, don't have them going through that building and trying to get out. I'm on the side that's right in front of the assembly area in the front of the building. They can go out the sides, and then they can walk around the building and all meet in the front.

330
00:43:26.880 --> 00:43:36.550
Ben Zara Minkin: Once you have all the little ones to the front, remember, it would be just like in the fire drill. Eventually, public safety is going to… it's a priority for public safety to respond to our child development centers first.

331
00:43:36.570 --> 00:43:46.619
Ben Zara Minkin: And same with, 911 coming to our schools. They are going to go to the child development centers because they know that our mobility impaired and that our younger students are

332
00:43:46.620 --> 00:43:51.830
Ben Zara Minkin: Children will need assistance in evacuating. So that's going to be their target hazard.

333
00:43:51.830 --> 00:44:10.479
Ben Zara Minkin: And that's where they're going to come up to you and ask you in real life, hey, is everybody out of the building? So you want to make sure that when you get everybody out to the front of the building, Christine, that you're just confirming, do we have everybody out of here? Did everybody make sure to go through your roster, and then get the all clear? This is a really good opportunity for us to practice that type of evacuation.

334
00:44:10.480 --> 00:44:11.810
Christine Herndon: Got it. We're ready.

335
00:44:12.120 --> 00:44:14.130
Ben Zara Minkin: Cool, I know you are. You guys do a great job.

336
00:44:14.130 --> 00:44:14.910
Christine Herndon: Thanks.

337
00:44:14.910 --> 00:44:20.920
Ben Zara Minkin: Huh. Next on the list is preparing you. We talked about air quality.

338
00:44:20.920 --> 00:44:23.590
Vince Garcia: Hey, Ben, one sec. I think you have a question from Nadia, and I.

339
00:44:23.590 --> 00:44:24.040
Ben Zara Minkin: Yeah.

340
00:44:24.040 --> 00:44:32.090
Vince Garcia: I mentioned I did put the BC radio, the Great Shakeout handout in the chat, so everybody has time to look at that and get familiar before the drill.

341
00:44:33.360 --> 00:44:39.649
Nadia Tariq (she/her/hers): Ben, what I was gonna… yeah, sorry, thank you, Vince. Ben, what I was gonna confirm, which you touched upon a little bit.

342
00:44:39.650 --> 00:44:59.840
Nadia Tariq (she/her/hers): How do you deal with individuals who are giving you challenge… challenges evacuating the building, right? Like, every time there's someone who is, like, dragging their feet, or don't want to participate, and like you said, we cannot force anybody, but we cannot technically clear the building until everybody's out.

343
00:45:00.900 --> 00:45:17.449
Ben Zara Minkin: Great question. So, what I'd like you to do is make a note of where they are and where you saw them. We can review, any type of student or employee on behavior, and then we refer them through the correct disciplinary channels. For students, it's going to go through the Vice President of Instruction.

344
00:45:17.450 --> 00:45:29.360
Ben Zara Minkin: And then if it's employees, then it goes over to human resources. We follow through the supervisory, through the chain of command in that modality. So you want to make sure that you try to note who they were or identify them.

345
00:45:29.630 --> 00:45:44.720
Ben Zara Minkin: But what I don't want you to do is spending time and trying to argue with them or identify them that you are not able to evacuate the building, right? Because in a true emergency, there's just going to be people that aren't going to listen, so it's really.

346
00:45:45.300 --> 00:46:04.280
Ben Zara Minkin: it's kind of the utilitarian approach, the greatest good for the greatest number of people that we use in evacuations, and so I want that to be in the back of all of our minds. Like, I would like you to try to make a note so we can identify that person, so we can hold them accountable, and we can let them know that this is required, if you're going to be an employer student here.

347
00:46:04.280 --> 00:46:25.169
Ben Zara Minkin: But we might have community members, like, we've done it in the gyms, for example, the athletic centers, and there's just people that refuse to leave, right? And in a true emergency, we have to try to help the people to get out that are trying to get out, and the people that are refusing to get to their own safety, they're gonna have to incur those risks.

348
00:46:25.170 --> 00:46:26.569
Ben Zara Minkin: Does that make sense?

349
00:46:28.770 --> 00:46:29.630
Nadia Tariq (she/her/hers): Thank you.

350
00:46:29.630 --> 00:46:33.760
Ben Zara Minkin: Yeah, and it's I'm sorry. So it's a crappy part of the

351
00:46:34.350 --> 00:46:47.220
Ben Zara Minkin: the job, I've had times where I've tried to talk to people in the gyms about our run-hide-fight strategy, or how to enroll in our emergency notification system, and they're like, I don't want to hear it. I don't want to even… I don't even want to be approached.

352
00:46:47.230 --> 00:46:55.699
Ben Zara Minkin: And then I find myself almost getting angry, like, why, you know, and I want to reach out to them. But, that's their right. By law, we're required

353

00:46:55.950 --> 00:47:09.120
Ben Zara Minkin: to communicate these strategies to them, and we're required to have these evacuations, but the people that disobey us, we need to worry about everybody else in the building, and we have very few building captains, right? And we have very few public safety officers.

354
00:47:09.120 --> 00:47:17.049
Ben Zara Minkin: So, imagine, you know, if you have around 20 or so buildings on each one of our campuses, that's a lot of ground to cover, especially after an earthquake.

355
00:47:19.030 --> 00:47:19.890
Ben Zara Minkin: Great.

356
00:47:20.040 --> 00:47:22.900
Ben Zara Minkin: Any other questions before I move on.

357
00:47:24.580 --> 00:47:43.839
Ben Zara Minkin: Cool. So, I… we're preparing for, El Nino, and, I know in last, safety committees here, we talked about the air quality problems from, like, wildfires, and, you know, I know we look outside and it's hot right now, but the governor has already, declared a state of emergency for the upcoming

358
00:47:44.200 --> 00:48:00.879
Ben Zara Minkin: El Nino, where they forecast that it's going to be basically stronger than any El Nino storm that we have in recorded history, and they're about 90% sure of that. What does that mean? I don't really know, because it seems like in years past, when they have

359
00:48:00.880 --> 00:48:06.269
Ben Zara Minkin: forecasted a dry winter, like in January of 2023, we had.

360
00:48:06.270 --> 00:48:18.239
Ben Zara Minkin: it really turned on its head, and then we had that Pineapple Express event where we had, like, very solid rain for almost, like, 20 hours straight here, and that flooded a lot of.

361
00:48:18.240 --> 00:48:37.440
Ben Zara Minkin: our rivers here in San Mateo County, and a lot of homes got flooded, and we also had substantial flooding on all three of our campuses. So we're preparing this year, and so what we've done is we've reached out to the crisis action teams on each campus, and we're preparing our essential services that are a part of those teams, and specifically.

362
00:48:37.790 --> 00:48:56.700
Ben Zara Minkin: On our facility side of the house, Michelle Radoski has reached out to the facility managers and has started pre-planning them, and they're doing things like preparing their sump pumps, and they're assessing their windows and door seals, and they're evaluating trees, and preparing their generators, and doing all of those things like that.

363
00:48:56.700 --> 00:49:08.650
Ben Zara Minkin: And Max, if I'm, you know, I miss anything, you can step in at any time, but they want all of facilities on their side of the house, they're preparing their campuses and hardening their campuses for the storm.

364
00:49:09.450 --> 00:49:14.950
Ben Zara Minkin: Our campus and district leadership, we want to make sure that.

365
00:49:15.210 --> 00:49:31.399
Ben Zara Minkin: Our CAT teams have up-to-date enrollment so that our texting groups includes everybody, so if the power goes out, and we send out a text, hey, the power's out at Skyline, everybody's getting it. So, for example, Tommy, we want to make sure that Tommy's on the Skyline emergency texting group.

366
00:49:31.400 --> 00:49:35.289
Ben Zara Minkin: Because that's a change from, you know, just a few months ago.

367
00:49:35.290 --> 00:49:46.579
Ben Zara Minkin: These changes happen all the time, and so we want to continue to update those lists and plan our vacations, so we have our Crisis Action Team continuity, as fully up-to-date and ready to go as possible.

368
00:49:46.640 --> 00:49:50.720
Ben Zara Minkin: For public safety, I'm glad, Brandon, you're here.

369
00:49:50.950 --> 00:50:10.110
Ben Zara Minkin: we want to make sure that all of our officers have their rain gear, their appropriate footwear when they're coming here, that they have, opportunity to have flashlights on their person, and that they have their appropriate PPE. And that could just be cold weather gear. I know at Skyline, you guys are all used to the inclement weather, but it can… it might get really cold.

370
00:50:10.110 --> 00:50:13.419
Ben Zara Minkin: outside quickly. And then.

371
00:50:13.420 --> 00:50:22.379
Ben Zara Minkin: Really to manage that situational awareness, because vehicles may not be able to see you, and so if we have our officers that are outside, and

372
00:50:22.810 --> 00:50:40.999
Ben Zara Minkin: we're in inclement weather, we want to make sure that we're wearing our reflective gear, and so that we don't get hit by vehicles. It's happened in the past, and so I want to make sure that our officers are all involved in those briefings, and so they understand the weather that's coming in, and that they're prepared before it happens.

373
00:50:41.040 --> 00:50:47.270
Ben Zara Minkin: We've sent out communications to our PIO team. We've partnered with the county and county messaging.

374
00:50:47.600 --> 00:50:54.140
Ben Zara Minkin: For how to help, the campus communities, not our employees, our, our.

375
00:50:54.450 --> 00:51:14.180
Ben Zara Minkin: our students, per se, but other people that also come here, and how to prepare their own homes, so that they are more resilient, and they can make it to campus. So for, like, having, go bags and emergency kits at your home, understanding where you can get sandbags for your own residence. If you go to

376
00:51:14.180 --> 00:51:17.120
Ben Zara Minkin: smcalert.info.

377
00:51:17.120 --> 00:51:23.600

Ben Zara Minkin: They… there's a page that's, prepared for El Nino, and it will give… and I'll put that in the chat.

378
00:51:23.940 --> 00:51:32.620
Ben Zara Minkin: That will give people, instructions on where they can go get sandbags for their house, or what types of things to put in their emergency kits to prepare for the storm.

379
00:51:32.620 --> 00:51:46.279
Ben Zara Minkin: and are harder in their homes, because, look, if our employees and our students can't make it to campus, it's going to impact our campus continuity, right, and our district continuity. So, it's our goal in emergency preparedness and also in public safety to make sure that we're making

380
00:51:46.280 --> 00:51:49.489
Ben Zara Minkin: all of our community members more resilient.

381
00:51:49.700 --> 00:52:04.800
Ben Zara Minkin: When that's expected to hit, our timelines are January through March are going to be the greatest impacts to the storm, so we do have some times, some time before that, but think about as you're parking on campus, I know.

382
00:52:04.880 --> 00:52:22.839
Ben Zara Minkin: I've noticed some dead trees here at CSM. You should make a mental note of that, whether you're an officer or whether you're an employee or a student, because we don't want you parking underneath those trees. I know people that have been here long enough can remember trees being down on every campus, and we do get cars that are crushed by trees.

383
00:52:22.840 --> 00:52:28.020
Ben Zara Minkin: And so that's a situational awareness that you can manage as an employee or student here.

384
00:52:28.510 --> 00:52:31.019
Ben Zara Minkin: Any questions about the coming of El Nino.

385
00:52:33.190 --> 00:52:35.600
Ben Zara Minkin: No? Perfect. Alright, that's all I got, Paul.

386
00:52:36.330 --> 00:52:37.870
Paul Cassidy: Thank you so much, Ben Zara.

387
00:52:37.870 --> 00:52:38.510
Ben Zara Minkin: Yep.

388
00:52:38.510 --> 00:52:51.260
Paul Cassidy: The next item is the approval of a committee chair, and, I did not see anyone…

389
00:52:51.460 --> 00:53:06.599
Paul Cassidy: who, indicated that they were interested in becoming the chair of this committee, and I did volunteer myself to continue. So, right now, that…

390
00:53:06.940 --> 00:53:19.939

Paul Cassidy: Candidacy is unopposed. If anyone wants to volunteer now, it's still… it's still possible. And, is… is anyone interested in becoming the committee chair?

391
00:53:21.430 --> 00:53:29.849
J Vangele: Not interested, but I thought at the last meeting that I had voted to extend your leadership through 2050.

392
00:53:29.850 --> 00:53:30.670
Paul Cassidy: Ha ha.

393
00:53:30.670 --> 00:53:32.150
J Vangele: Is that… isn't that in the minutes?

394
00:53:32.150 --> 00:53:33.840
Paul Cassidy: I don't think it is.

395
00:53:33.840 --> 00:53:35.280
J Vangele: I'd like to add that now, please.

396
00:53:35.280 --> 00:53:36.300
Paul Cassidy: All right.

397
00:53:36.470 --> 00:53:38.429
Paul Cassidy: Thank you, Jim.

398
00:53:38.540 --> 00:53:46.439
Paul Cassidy: I appreciate the confidence. So I guess we should have a vote. We need a motion to vote on. Motion.

399
00:53:46.440 --> 00:53:48.010
Will Minnich (he, his, him): and approve Paul as our chair.

400
00:53:48.010 --> 00:53:48.650
Paul Cassidy: Yeah.

401
00:53:49.310 --> 00:53:50.080
Will Minnich (he, his, him): the second.

402
00:53:50.080 --> 00:53:52.630
Melissa Komadina: I second it. Thank you, Paul.

403
00:53:52.630 --> 00:53:54.700
Paul Cassidy: All right, my pleasure.

404
00:53:54.700 --> 00:54:02.570
Will Minnich (he, his, him): You shouldn't do this yourself. I said, can we get a vote, please? Everyone raise their hand. Just make it all clean that you are not betting anybody's.

405
00:54:03.250 --> 00:54:05.820

Will Minnich (he, his, him): Will here, no pun intended.

406
00:54:06.200 --> 00:54:09.670
Will Minnich (he, his, him): And you can do the counting, though… Great.

407
00:54:09.670 --> 00:54:11.689
Ben Zara Minkin: I can't even vote, but I'm gonna raise my hand too.

408
00:54:11.690 --> 00:54:19.709
Will Minnich (he, his, him): Awesome, great. Thank you, Benzar. My hand's up as well. Cool, cool, cool. All right, hands down, everybody.

409
00:54:20.190 --> 00:54:22.829
Will Minnich (he, his, him): Anyone, know for Paul?

410
00:54:23.910 --> 00:54:25.400
Will Minnich (he, his, him): Abstentions?

411
00:54:25.820 --> 00:54:29.259
Will Minnich (he, his, him): Paul, you're it. Congratulations. Thank you so much. You do a great job.

412
00:54:29.440 --> 00:54:33.310
Paul Cassidy: Thank you, thank you. You guys make it easy. So.

413
00:54:34.040 --> 00:54:42.709
Paul Cassidy: That's concluded. Moving to the next item, which I think is the group con… the constituent group updates. However.

414
00:54:45.880 --> 00:55:02.839
Paul Cassidy: Max, already gave us an update for campus lighting. There is a… in response to some of the, items that were raised in this committee, there is a safety orientation scheduled for the new occupants of B2.

415
00:55:02.840 --> 00:55:09.660
Paul Cassidy: Specifically for that building, and how best to utilize its emergency features, and just

416
00:55:09.660 --> 00:55:10.979
Paul Cassidy: Generally getting to know.

417
00:55:11.210 --> 00:55:19.769
Paul Cassidy: how to be ready for things to happen in the building. And that is for Thursday, October 29th, from

418
00:55:19.920 --> 00:55:21.540
Paul Cassidy: 8 to 12.

419
00:55:23.340 --> 00:55:30.699
Paul Cassidy: And, Debra was… Debra and Benzara were helpful in setting that up, so I just want to say thank you.

420

00:55:30.920 --> 00:55:32.090
Paul Cassidy: And.

421
00:55:32.210 --> 00:55:49.449
Paul Cassidy: So that's the B2. The Building Captain Program updates, there's a link in the agenda that goes to the website. Some updates have been made. Thank you, Vince, for doing that. There are some vacancies, and I am…

422
00:55:49.510 --> 00:55:53.660
Paul Cassidy: Going to reach out to the various.

423
00:55:53.870 --> 00:56:05.750
Paul Cassidy: parties involved, including the deans and the vice presidents, to see how best or how promptly we can fill those vacancies, and then, ideally, they would attend the soonest building captain training.

424
00:56:05.860 --> 00:56:14.149
Paul Cassidy: Ben Zara and inherit the go bag and the radio and everything else, that goes with that. So.

425
00:56:14.680 --> 00:56:21.390
Paul Cassidy: There'll be probably more updates on that the next time we get together, which will be on November the 5th.

426
00:56:21.930 --> 00:56:30.320
Paul Cassidy: And then we talked about the Great Shakeout, and then there's also a link for first aid, CPR, and AED training.

427
00:56:32.510 --> 00:56:46.430
Paul Cassidy: Which brings us to future agenda items. Does… we… we did, touch on a few here that… that when we made our… when I made the report to CGC for last year's activity.

428
00:56:46.430 --> 00:56:54.109
Paul Cassidy: Nadia very helpfully surfaced some issues from her constituency, but, we could continue to do that, so if anyone

429
00:56:54.110 --> 00:56:55.519
Paul Cassidy: would like to

430
00:56:55.520 --> 00:57:02.939
Paul Cassidy: add an item to the agenda, you can say so now, or you can email me if that's more convenient at any time.

431
00:57:03.010 --> 00:57:03.890
Paul Cassidy: Melissa.

432
00:57:04.520 --> 00:57:16.649
Melissa Komadina: Hi, everyone. Just, I'll do a quick introduction. Melissa Komadina, I'm an acting dean for SPWD, so just sitting in Lindsay Ayotte's chair just for this semester only.

433
00:57:16.650 --> 00:57:40.150

Melissa Komadina: Just want to give a quick shout out to Max, thank you so much for your help, with SPWD's request, because I understand, both Danielle's storage was taken care of, so thank you very much, and our refrigerator was delivered, so thank you very much. So appreciated. I don't know if this is appropriate for a future agenda item, but just as an observation, as a staff member, who parks down by the soccer field.

434
00:57:40.210 --> 00:57:45.670
Melissa Komadina: I have noticed the impact with our community members, which is fantastic that they're using our fields.

435
00:57:45.670 --> 00:58:01.189
Melissa Komadina: However, it's impacted the parking lot, and there seem to be young, soccer players, and they seem to be unmonitored, so my concern as a parent and, you know, staff member is just driving through that

436
00:58:01.230 --> 00:58:04.450
Melissa Komadina: That stretch as I'm heading out to the main

437
00:58:04.610 --> 00:58:07.999
Melissa Komadina: Road… just the young ones who are kind of…

438
00:58:08.140 --> 00:58:26.280
Melissa Komadina: untethered, and it just… it's a very congested area, so I just wanted to raise it as a concern. I don't know what's appropriate as a… as a discussion item, but wanted to… to raise that, and I'm sure CAD… yeah, CAD, I'm sure Dino's, you know, aware of this, but anyhow, I just wanted to raise it, so thank you.

439
00:58:26.280 --> 00:58:38.510
Paul Cassidy: I put on the share, I guess you can see it, a map of the campus, and I have a feeling, my sense is, you're talking about this spot right across from Lot P.

440
00:58:38.720 --> 00:58:42.340
Paul Cassidy: That leads down to the lower field? Is that what you're talking about?

441
00:58:42.340 --> 00:58:48.990
Melissa Komadina: Let's see, so it's… it's the… it's our staff lot that's right next to CAD and right next to the tennis courts.

442
00:58:48.990 --> 00:58:49.710
Paul Cassidy: Here.

443
00:58:49.710 --> 00:59:01.490
Melissa Komadina: And right after hours, right at the after-school hours, it looks like parents are doing drop-off, and parents are parking, so it becomes a very high-impact area, and then.

444
00:59:01.490 --> 00:59:09.980
Melissa Komadina: with that, the kids are walking just around, because they need to access the field. Sorry, I'm looking at this. They need to access.

445
00:59:10.290 --> 00:59:15.810
Melissa Komadina: It looks like, yeah, they're accessing the baseball and the track, and…

446

00:59:16.230 --> 00:59:18.809
Melissa Komadina: They're not using the upper soccer.

447
00:59:18.810 --> 00:59:20.850
Paul Cassidy: There's tennis players, too. They're all free.

448
00:59:20.850 --> 00:59:25.650
Melissa Komadina: Yes, there's… yes, there are. So it's… it's that stretch from the.

449
00:59:25.820 --> 00:59:27.690
Melissa Komadina: Sorry, my vision, my eyes are really.

450
00:59:27.690 --> 00:59:28.730
Paul Cassidy: Law R.

451
00:59:28.860 --> 00:59:31.860
Melissa Komadina: Yes, yes.

452
00:59:32.090 --> 00:59:37.460
J Vangele: So, yeah, so those are… those are usually contracted events. Tommy, if you could please…

453
00:59:37.460 --> 00:59:55.589
J Vangele: kind of summarize the notes on that, contact Dino, make sure that he addresses those issues in the contracts that are, agreed to with the soccer teams that come and utilize the things, and then that'll be… that'll be handled that way. But yeah, we have a contract with various

454
00:59:55.590 --> 01:00:15.410
J Vangele: groups and youth groups and all that kind of stuff. We've had other issues not related to them, but in the past, we've had issues. We just amend the language in the contract and make them responsible for their own behavior, and then things usually clean up. Public Safety can also check on that, but Tommy, your best bet is going to be working with Dino to make sure that gets addressed.

455
01:00:15.980 --> 01:00:21.000
Thommy Reyes: Yeah, I will reach out to him today, and we'll also brief our officers to make sure that they're aware of that.

456
01:00:21.200 --> 01:00:26.860
Thommy Reyes: And, perhaps, increase, the, the patrolling in that area during these events.

457
01:00:28.100 --> 01:00:28.800
J Vangele: Thank you.

458
01:00:33.210 --> 01:00:35.310
Paul Cassidy: Thank you, Melissa, for bringing that up.

459
01:00:40.220 --> 01:00:48.610
Paul Cassidy: Town of Portsmouth, So, that brings us to the end of the agenda, unless anyone would like to add another item.

460
01:00:48.800 --> 01:01:04.220
Paul Cassidy: Again, you can email me at any time between now and our meeting on, November 5th, and I'd be happy to, add it, and ideally do a little, exploration beforehand, so… Is Matt.

461
01:01:04.220 --> 01:01:05.260
J Vangele: Max still here?

462
01:01:06.650 --> 01:01:10.379
Paul Cassidy: he's… Zoom instance is still here.

463
01:01:10.380 --> 01:01:11.279
Max Warne: I'm still here, yes.

464
01:01:11.740 --> 01:01:26.870
J Vangele: So there's a question about the update on AT&T, the DAS mobile network. I'm speaking unofficially, but my understanding is it's moving along as scheduled and we should see big improvements around January 2027.

465
01:01:26.870 --> 01:01:46.690
Max Warne: Yes, that's correct. I believe… I was just trying to look through my email to… I didn't want to provide the wrong info, but, I believe the plan is for everything to go live in December. There will be some testing, you know, afterwards, but I believe first of the year, everything should be up and operational, as far as what I understand.

466
01:01:47.470 --> 01:02:02.650
J Vangele: So that's gonna be super, because not only are we gonna have vastly improved cell phone service on campus, but we're also… that's the same timeframe for the Zoom phone, so we're gonna have much better district phone service, so…

467
01:02:02.650 --> 01:02:07.929
J Vangele: All phone service, campus-wide, should be much, much better than what we have now.

468
01:02:10.000 --> 01:02:20.270
Thommy Reyes: But if I… if I can add to the, Max, I think you did say, though, that this… this is going to be primarily be, in the indoor setting, right?

469
01:02:20.550 --> 01:02:21.130
Max Warne: Yeah.

470
01:02:21.130 --> 01:02:23.159
Thommy Reyes: Not necessarily the outdoor.

471
01:02:23.390 --> 01:02:29.950
Max Warne: Yeah, so there's, there's two components to the DAS. There's IDAS and ODAS. IDAS is interior, so…

472
01:02:30.430 --> 01:02:54.740
Max Warne: The devices have been installed already throughout the buildings, all floors. There is the ODAS component. So there's only two locations that we were permitted to add an ODAS device. I believe one of them is for Lot L out in front of Building 19, and then the other device will go on Building 3.

473

01:02:54.780 --> 01:02:59.949
Max Warne: And that's to give better coverage, in the athletic fields.

474
01:03:01.330 --> 01:03:08.409
Max Warne: The reason why it scaled back from the original plan was due to the bleed over into the adjacent neighborhoods.

475
01:03:08.870 --> 01:03:23.890
Max Warne: The cell phone carriers do not… they… they don't permit that, so that's why it was tailored back to prevent that, and there's no way that if we were to try and get all of the outdoor coverage, there would just be so much bleed over into the neighborhoods that it wouldn't be permissible, so…

476
01:03:27.490 --> 01:03:28.350
Thommy Reyes: Thank you, Max.

477
01:03:28.350 --> 01:03:28.950
Max Warne: Yep.

478
01:03:35.970 --> 01:03:37.870
Paul Cassidy: Okay,

479
01:03:39.660 --> 01:03:49.880
Paul Cassidy: I don't see any more questions. All right. I think that brings us to the end of today's agenda. I just want to say thank you for everyone for your valuable time.

480
01:03:49.880 --> 01:04:00.429
Paul Cassidy: This committee does an important function in keeping the campus safe. It's a larger committee because more eyes is exactly what we want. If you see anything that looks off.

481
01:04:00.540 --> 01:04:18.060
Paul Cassidy: or weird, even if it's way outside your area or something like that, please don't hesitate to bring it up here, or call Public Safety, or anyone else here would be happy to chase down whatever the situation is and try to improve it. So, I just want to say that. And…

482
01:04:18.060 --> 01:04:26.939
Paul Cassidy: Thank you, everyone, and we're always here if anybody needs anything. And, thank you again for the vote of confidence. I really do… I'm a little bit…

483
01:04:27.080 --> 01:04:27.840
Paul Cassidy: A.

484
01:04:28.190 --> 01:04:32.079
Paul Cassidy: honored about that. A lot honored, so thank you for that.

485
01:04:32.080 --> 01:04:33.250
J Vangele: 2050.

486
01:04:34.090 --> 01:04:35.090
Paul Cassidy: 2050, yeah.

487
01:04:35.090 --> 01:04:36.460
Cherie Colin: Thank you for agreeing to continue.

488
01:04:36.460 --> 01:04:37.520
Paul Cassidy: Ha ha ha!

489
01:04:37.520 --> 01:04:38.680
Cherie Colin: We appreciate it.

490
01:04:39.790 --> 01:04:45.209
Paul Cassidy: Anytime. All right, so I'll see everybody, have a great.

491
01:04:45.430 --> 01:05:01.550
Paul Cassidy: couple weeks, enjoy the fall weather, and hopefully the, El Nino isn't nearly as bad as we've heard, but I guess we should be ready for anything. So, everybody have a good… have a good day, have a… have a nice, week, and, we'll see you all in, November.

492
01:05:02.370 --> 01:05:03.170
Emily Risk: Thank you.

493
01:05:03.470 --> 01:05:04.010
Thommy Reyes: the.

494
01:05:04.010 --> 01:05:04.390
Max Warne: everyone.

495
01:05:04.390 --> 01:05:05.240
Thommy Reyes: day.

496
01:05:05.240 --> 01:05:05.670
Brandon Becerra: Goodbye.

497
01:05:05.670 --> 01:05:06.389
Thommy Reyes: Thank you.

498
01:05:06.820 --> 01:05:07.480
Phillip Williams: Right.
