

CPR Share Outs Feedback

**Institutional Effectiveness Committee
May 11, 2026**

Primary Role at Skyline College (n=18)

Value of CPR Share Outs (n= 18)

Open Ended Responses: What Worked Well

- Very informative about what programs are doing and their challenges, including what they're doing to resolve them

- Format

"I appreciate this format as the poster presentations allow for Q&A of programs and for audience to view at their own pace. I learned a lot during the panel discussions - much of what I would not be able to learn about our programs and departments otherwise. This made for great discussions."

Open Ended Responses: Room for Improvement

- Format – desire for it to be more conversational
 - *“It is hard when not every program answers the same question. It also seemed to be less a conversation and more disjointed.”*
 - *“Panel format is too rigid. People's answers felt forced and not very authentic. wish it were more conversational.”*
- Informative but unclear how to help the programs with their goals

Share Outs Breakout Room Discussion Qs

- How can we spark more dialogue between program representatives, making it more conversational?
- How can we increase attendance at the CPR Share Outs?
- What are your general impressions of what worked or can be improved?
