

## Annual Administrative Leadership and Unit Review (2014/15)

The Annual Administrative Leadership and Unit Review (ALUR) is the ongoing, systematic assessment of our programs and services. Many levels of assessment provide information upon which decisions can be based, including Student Learning Outcomes at the course, program and institutional level, Instructional Program Review, Student Services Program Review and Administrative Leadership and Unit Review (ALUR) make up the central review components of the integrated planning process at Skyline College. The purpose ALUR is to improve the overall quality of services and to ensure that the units are effective in meeting the needs of our diverse faculty, staff and students. Along with Academic Program Review, ALUR supports the realization of the Strategic Plan by providing a system to ensure that our current work is effectively connected to the college mission, vision, values and goals. ALUR will inform the college strategic priorities and resource allocation decisions.

Research indicates that collecting and analyzing evidence leads to improvement of institutional or unit level effectiveness. In addition, the benefits of conducting ALUR include:

- Provides for ongoing review of unit services and programs
- Documents outcomes assessment and internal improvement efforts
- Allows each unit to demonstrate how well it is performing
- Facilitates the integration of planning to resource allocation (budgeting and expenditures)
- Facilitates evidenced based decision making related to planning and budgeting
- Facilitates a continuous improvement process that includes prioritizing improvements.
- Establishes, clear priorities that link to university mission and priorities
- Improves short-range and long-range planning to reach those priorities
- Facilitates participation and input from members regarding improvement
- Facilitates the integration of assessment methods into its operations for continual feedback
- Improves levels of client, participant, student, community and employee satisfaction
- Enhances communication within the department
- Supports skill development and improvement for staff and administrators in the unit
- Facilitates a broader understanding of college planning and budgeting processes

## Appendix I

### Steps to Developing Assessment Plans & Reports

- 1. Unit develops measurable Service Area Outcomes (SAO).** An SAO is a “specific statement that describes the benefit that a [unit] hopes to achieve or the impact [. . .] that is a result of the work that your unit performs. Outcomes should be:
  - Challenging but attainable”
  - Articulate what the unit wants to achieve
  - Indicate end results for the unit rather than actions
  - Relate to the unit’s mission and vision
  - Focus on the benefit to the recipient of the service
  - Be stable over a number of years. If it is time dependent, it is most likely a goal not an outcome; and
  - Be measurable and directly related to the work of your unit.<sup>1</sup>

Stems for writing outcomes can include:

- “Participants served will know or be able to....”
- “In support of student learning, faculty and staff will \_\_\_\_\_”
- “Students will know or be able to ...”
- “The community will know or be able to ....”

- 2. Unit defines how it will assess progress (non-evaluative) towards the outcomes.** The unit might consider taking an inventory of current tools being used. For example:
  - What information is being collected already?
  - What assessment are you already using?

Methods that can be used to measure progress include, for example:

- Student satisfaction surveys
- Number and type of complaints
- Growth in a specific function
- Comparisons to professional organizations’ best practices
- Focus groups
- Opinion surveys

- Time to complete a task
- Levels of successful participation or acquisition of service

- 3. Unit completes the assessment plan and carries out the assessment.** In order to ensure the plan is completed
  - Designate a coordinator for the assessment project and/or assign responsibility for individual components
  - Develop a timeline indicating when work will be collected, results tabulated, analysis completed, and subsequent dialogues.
- 4. Unit gathers information, analyzes results, communicates findings, and takes action.** This step is important as it is used to identify changes needed to improve efficiency, effectiveness, and unit performance. It should also be applied to for planning and budgeting and resource allocation requests (short term and long term). Ultimately it may be tied to the institution's ability to achieve its mission.
