

Environmental Scan Implications for Planning

Ingrid Vargas

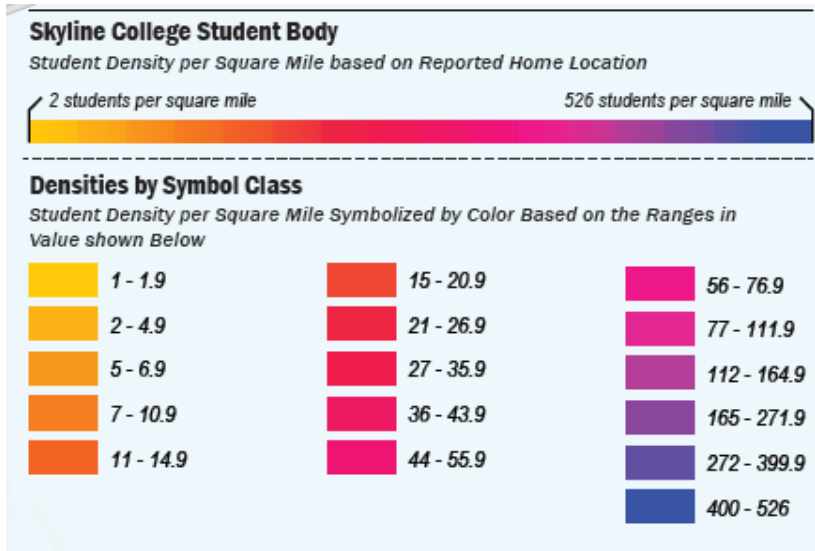

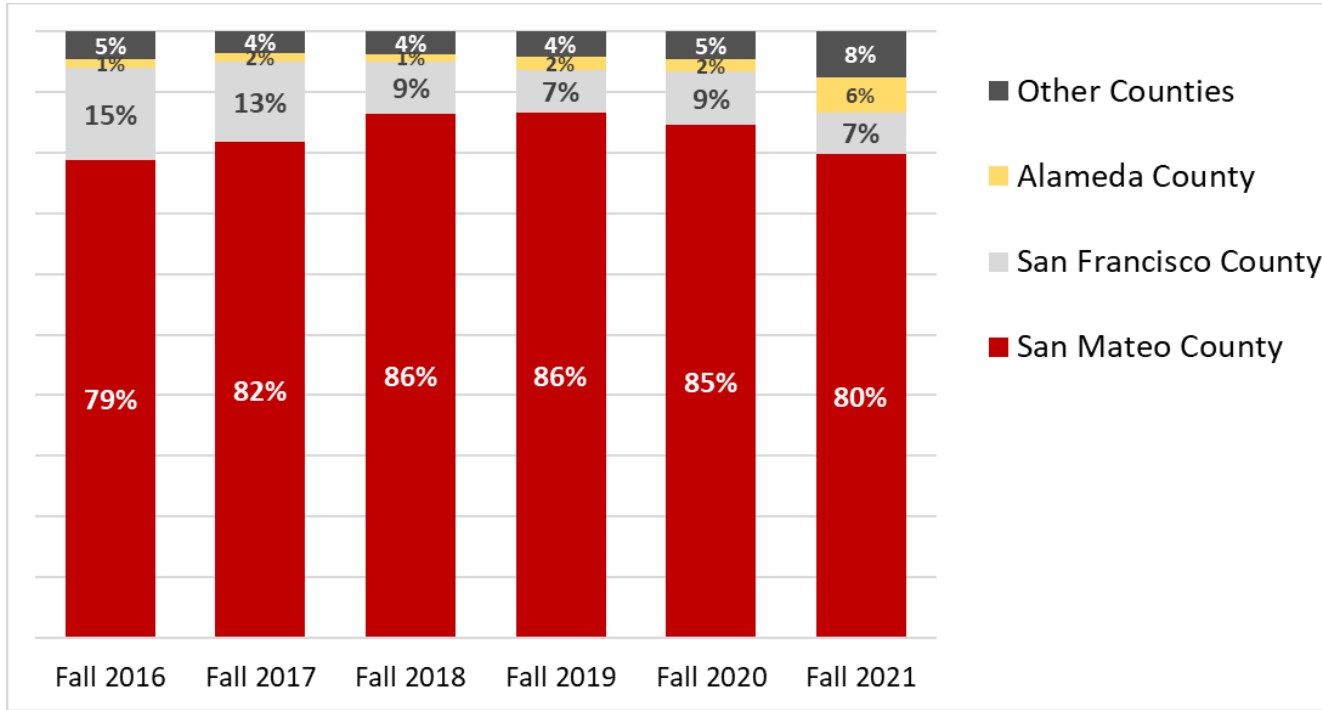

Dean of Planning, Research, Innovation and Effectiveness

Environmental Scan Purpose

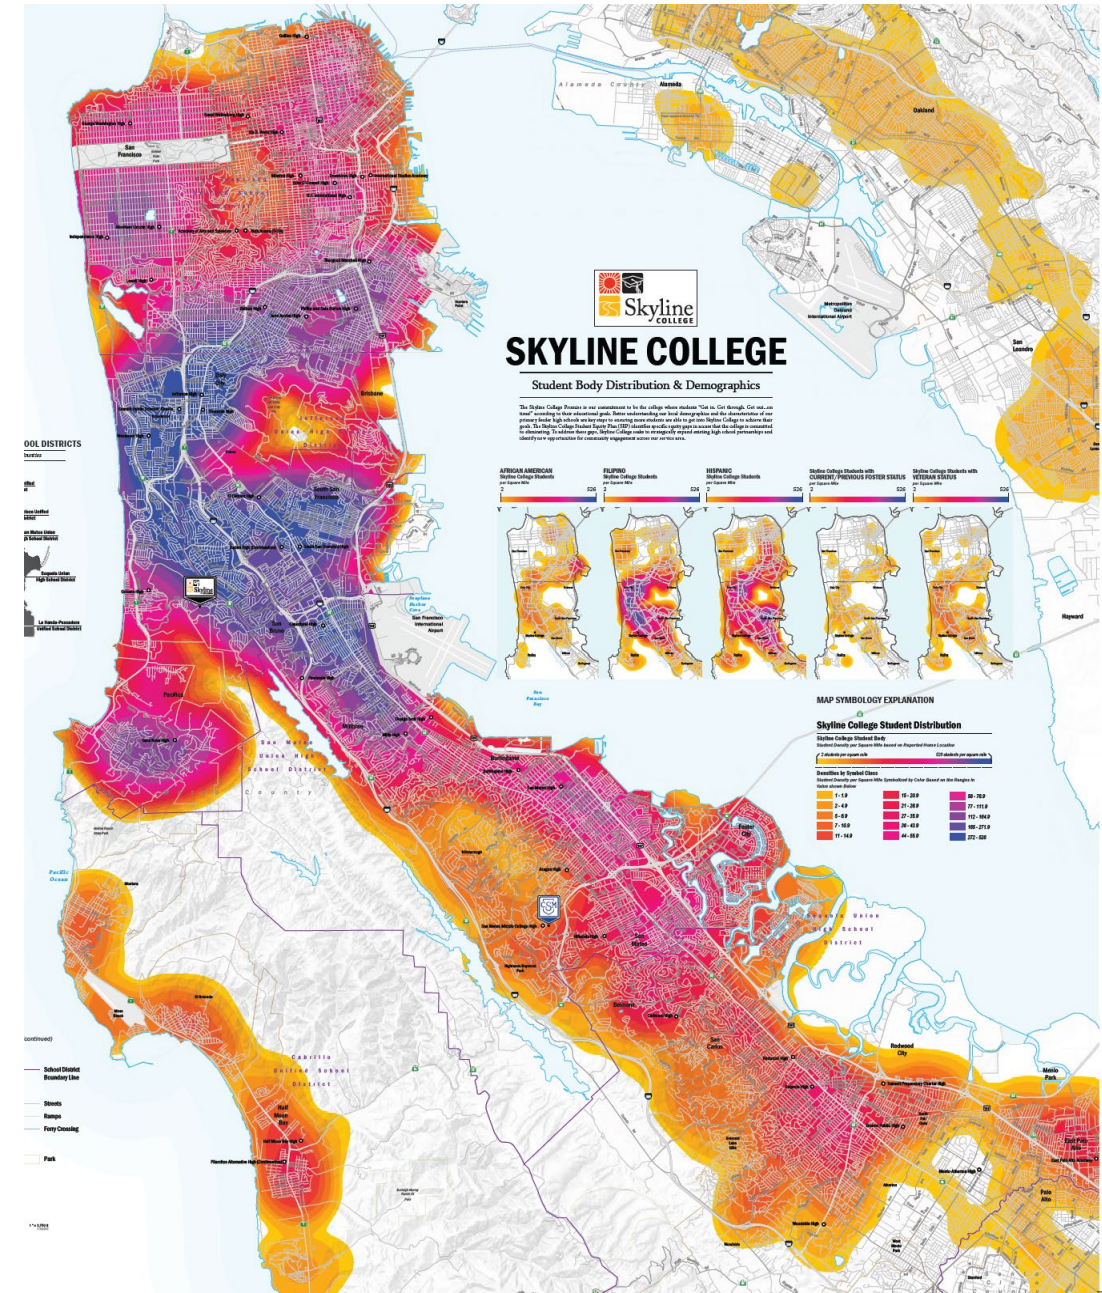

Effective strategic planning processes require input about the external environment

Environmental scanning is a process that systematically surveys and interprets relevant data to **identify external opportunities and threats** that could influence future decisions. It is often used in conjunction with a **S.W.O.T. analysis**.

Skyline Student County of Residence

Skyline Student Residence Heat Map c. 2016

San Mateo County Environmental Scan

PRIE at 3 campuses looked at San Mateo County:

- Demographics
- Cost of Living
- Income Disparities
- K-12 Education
- Educational Attainment
- Transportation
- Labor Market
- Occupational Trends
- Pandemic Impacts

Story that emerged is familiar....

- Rising cost of living
- Increasing wealth disparities
- Lower income households driven out
- Ageing population
- Declining K-12 enrollments
- Fewer students graduating from area high schools
- Decline in proportion of HS grads going to community college

All of these trends have been exacerbated by the Pandemic!

Breakout Group Exercise

Internal scan data and activity coming in Spring 2022

Today's exercise focuses on the external scan

Next semester we'll be combining the internal and external to engage the campus community in a full SWOT analysis
