

A.S. Surgical Technology Program Lottery

If more applications are received than seats in the program, a Lottery Protocol is followed to randomly select a cohort and waitlist. The waitlisted applicants will be contacted if an admitted student doesn't complete the program requirements or chooses to not enroll in the program. In the Surgical Technology program, 20 applicants will be admitted to each cohort, with up to 30 applicants placed on a waitlist.

Lottery Protocol

Pool A: Applicants who did not get accepted from Pool B the previous year move to Pool A. A Pool A applicant will receive two entries into the lottery, +1 additional entry for each annual reapplication. *Please note that you cannot “skip” pool B. You can only go from C to B, or from B to A.*

Pool B: New applicants with a completed application who successfully passed all prerequisite courses and submitted all official transcript(s) to SMCCCD [Transcript Evaluation Services](#) by the application deadline.

Pool C: New applicants with a completed application but incomplete prerequisite courses by the application deadline. Pool C applicants may be considered if seats are still available after Pools A and B have been admitted. This is up to the Program Director's discretion.

Please Note

Any application submitted without the required official transcript(s) by the application deadline will be considered INCOMPLETE and will not be a part of the lottery.

Applications are only kept on file for one application cycle. If you do not reapply the following cycle, a new, complete application will be required.
